CONTENTS OF VOLUME 259

No. 1 *July* 1976

PAGE

Sites of autoregulatory escape of blood flow in the mesenteric vascular bed. By C. V. Greenway, G. D. Scott and J. Zink . 1

The number of sodium ion pumping sites in skeletal muscle and its modification by insulin. By D. Erlij and S. Grinstein . . 13

Stimulation of the sodium pump by azide and high internal sodium changes in the number of pumping sites and turnover rate. By D. Erlij and S. Grinstein 33

The role of cyclic 3′, 5′-adenosine monophosphate (cyclic AMP) in the ability of sympathetic nerve stimulation to enhance growth and secretion in rat salivary glands *in vivo*. By T. C. Muir and D. Templeton 47

Dynamic properties of the responses of single neurones in the cochlear nucleus of the rat. By Aage R. Møller 63

Evidence for genetic control of glycine uptake in cultured cells, regulated by the amino acid concentration of the growth medium. By Susan P. Hume and J. F. Lamb 83

Kinetics and energetics of calcium efflux from intact squid giant axons. By P. F. Baker and P. A. McNaughton 103

The temperature dependence of the movement of potassium and chloride ions associated with nerve impulses. By D. Landowne and V. Scruggs 145

Functional and structural changes in mammalian sympathetic neurones following colchicine application to post-ganglion nerves. By Dale Purves 159

Effects of the ionophore X-537A on acetylcholine release at the frog neuromuscular junction. By Hiroshi Kita and William van der Kloot 177

Activation of two types of fibres in rat extraocular muscles. By D. J. Chiarandini 199

Regulation of cerebrospinal fluid potassium by the cat choroid plexus. By Russell F. Husted and Donal J. Reed . . . 213

PAGE

Reflex activation of symapthetic pathways to vesical pathways smooth muscle and parasympathetic ganglia by electrical stimulation of vesical afferents. By W. C. DE GROAT and R. J. THEOBALD . 223

Evidence that brain prostaglandin synthesis is not essential in fever. By W. I. CRANSTON, G. W. DUFF, R. F. HELLON, D. MITCHELL and YVONNE TOWNSEND 239

No. 2 *July* 1976

Functional characteristics of lateral interactions between rods in the retina of the snapping turtle. By D. R. COPENHAGEN and W. G. OWEN 251

The effects of very low external calcium and sodium concentrations on cardiac contractile strength and calcium-sodium antagonism. By D. J. MILLER and D. G. MOISESCU 283

Sensitivity of renin secretion to volume depletion in the anaesthetized dog: comparison between urinary drainage and slow haemorrhage. By I. BERTONCELLO, R. J. NAUGHTON and S. L. SKINNER . 309

Relationships between the spike components and the delayed depolarization in cat spinal neurones. By FAUSTO BALDISSERA . 325

Unit responses in the medulla oblongata of rabbit to changes in local and cutaneous temperature. By S. INOUE and N. MURAKAMI . 339

The formation of metarhodopsin$_{380}$ in the retinal rods of the frog. By C. BAUMANN 357

Synaptic depression related to presynaptic axon conduction block. By HANNS HATT and DEAN O. SMITH 367

Non-uniform probabilities of quantal release at the crayfish neuromuscular junction. By HANNS HATT and DEAN O. SMITH . 395

Strain sensitivity and directionality in cat atrial mechanoreceptors *in vitro*. By K. M. CHAPMAN and J. H. PANKHURST . . 405

An octopus toxin, maculotoxin, selectively blocks sodium current in squid axons. By PETER W. GAGE, JOHN W. MOORE and MONTE WESTERFIELD 427

The influence of gastric distension and the duodenal infusate on the pattern of stomach (abomasal) emptying in the preruminant calf. By F. R. BELL and D. J. WATSON 445

PAGE

Mechanosensitive afferent units in the hypogastric nerve of the cat. By K. Floyd, Verity E. Hick and J. F. B. Morrison . 457

Alterations in amounts and rates of serotonin transported in an axon of the giant cerebral neurone of *Aplysia californica*. By Daniel J. Goldberg, James E. Goldman and James H. Schwartz 473

The dark adaptation curve of rods measured by their after-image. By C. J. Gosline, D. I. A. Macleod and W. A. H. Rushton . 491

Inhibition of food intake in the rat following complete absorption of glucose delivered into the stomach, intestine or liver. By D. A. Booth and S. P. Jarman 501

Respiratory modulation of baroreceptor and chemoreceptor reflexes affecting heart rate and cardiac vagal efferent nerve activity. By N. S. Davidson, S. Goldner and D. I. McCloskey 523

Stretch reflex and servo action in a variety of human muscles. By C. D. Marsden, P. A. Merton and H. B. Morton . . . 531

Adverse effects of Tris hydrochloride, a commonly used buffer in physiological media. By J. S. Gillespie and A. T. McKnight . 561

No. 3 *August* 1976

Respiratory and cardiovascular interactions in ducks: the effect of lung denervation on the initiation of and recovery from some cardiovascular responses to submergence. By Owen S. Bamford and David R. Jones 575

Calcium conductance in relation to contractility in frog myocardium. By Magda Horackova and Guy Vassort . . . 597

Calcium-sodium antagonism on the frog's heart: a voltage-clamp study. By C. Benninger, H. M. Einwächter, H. G. Haas and R. Kern 617

Interaction between inhibitory and excitatory synaptic potentials at a peripheral neurone. By F. R. Edwards, G. D. S. Hirst and E. M. Silinsky 647

Statistical fluctuations in charge transfer at Ia synapses on spinal motoneurones. By F. R. Edwards, S. J. Redman and B. Walmsley 665

Non-quantal fluctuations and transmission failures in charge transfer at Ia synapses on spinal motoneurones. By F. R. Edwards, S. J. Redman and B. Walmsley 689

PAGE

The effect of polarizing currents on unitary Ia excitatory post-synaptic potentials evoked in spinal motoneurones. By F. R. Edwards, S. J. Redman and B. Walmsley 705

Blood pressure and sleep in the rat in normotension and in neurogenic hypertension. By L. F. Junqueira Jr. and E. M. Krieger 725

Threshold setting by the surround of cat retinal ganglion cells. By H. B. Barlow and W. R. Levick 737

Lithium transport by the colon of normal and sodium depleted rats. By Diana E. M. Dolman and C. J. Edwards 759

The effect of lithium on the transport of sodium, potassium and chloride by the colon of normal and sodium depleted rats. By Diana E. M. Dolman and C. J. Edmonds 771

Effects of antrectomy or porta-caval shunting on the histamine-storing endocrine-like cells in oxyntic mucosa of rat stomach. A fluorescence histochemical, electron microscopic and chemical study. By R. Håkanson, L.-I. Jarsson, G. Liedberg, J. Oscarson, F. Sundler and J. Vang 785

The oxidation of glucose, ketone bodies and acetate by the brain of normal and ketonaemic sheep. By D. B. Lindsay and B. P. Setchell 801

Caudate stimulation and substantia nigra activity in the rat. By A. Dray, T. J. Gonye and N. R. Oakley 825

PROCEEDINGS OF THE PHYSIOLOGICAL SOCIETY

9–10 April 1976

SUBJECT INDEX

Acetylcholine, the effect of – on the electrical activity of colonic mucosa (rat), **259,** 58*P*

Adenosine 3′,5′-phosphate, the role of cyclic – (cyclic AMP) in the ability of sympathetic nerve stimulation to enhance growth and secretion in rat salivary glands *in vivo*, **259,** 47

Adenylate cyclase, interactions of guanyl-nucleotides, parathyroid hormone and analogues with chick kidney –, **259,** 53*P*

Adrenocorticotrophin, plasma ACTH levels during human pregnancy, **259,** 51*P*

Afferents, afferent discharges in the sacral ventral roots of cats, **259,** 37*P*

Amino acid transport, evidence for genetic control of glycine uptake in cultured cells, regulated by the amino acid concentration of the growth medium (HeLa cells, *Xenopus laevis*), **269,** 83

Amino acids, the influx of labelled – into single muscle fibres of the barnacle. *Balanus nubilis*, **259,** 43*P*

-aminobutyric acid, effects of the para-chlorophenyl derivative of – on spinal neurones in the cat, **259,** 46*P*

caudate stimulation and substantia nigra activity in the rat, **259,** 825

Amniotic fluid, stability of very small bubbles in human –, **259,** 60*P*

Anaesthesia, fluctuating anaesthetic state in the rat anaesthetized with urethane, **259,** 11*P*

the effect of anaesthetic agents on the responses of cells in the cuneate nucleus of the rat, **259,** 15*P*

Angiotensin II, studies on the action of – on rat jejunal fluid transfer, **259,** 33*P*

Appetite, inhibition of food intake in the rat following complete absorption of glucose delivered into the stomach, intestine or liver, **259,** 501

Atrial pressure, blood pressure and sleep in the rat in normotension and in neurogenic hypertension, **259,** 725

Atrial receptor, strain sensitivity and directionality in cat atrial mechanoreceptors *in vitro*, **259,** 405

Auditory pathways, dynamic properties of the responses of single neurones in the cochlear nucleus of the rat, **259,** 63

Autoregulatory escape, sites of – of blood flow in the mesenteric vascular bed (cat), **259,** 1

Axonal transport, alterations in amounts and rates of serotonin transported in an axon of the giant cerebral neurone of *Aplysia californica*, **259,** 473

Axon, kinetics and energetics of calcium efflux from intact squid giant axons, **259,** 103

the temperature dependence of the movement of potassium and chloride ions associated with nerve impulses (squid), **259,** 145

an octopus toxin, maculotoxin selectively blocks sodium current in squid –, **259,** 427

Axotomy, functional and structural changes in mammalian sympathetic neurones following colchicine application to post-ganglionic nerves (guinea-pig), **259,** 159

Azide, stimulation of the sodium pump by – and high internal sodium: changes in the number of pumping sites and turnover rate (frog), **259,** 33

Baroreceptor reflex, respiratory modulation of baroreceptor and chemoreceptor reflexes affecting heart rate and cardiac vagal efferent nerve activity (dog), **259,** 523

blood pressure and sleep in the rat in normotension and in neurogenic hypertension, **259,** 725

Blood flow, sites of autoregulatory escape of – in the mesenteric vascular bed (cat), **259,** 1

Bone, prostaglandins as possible mediators of tumour-induced – resorption (man, mouse), **259,** 7*P*

Brain, the oxidation of glucose, ketone bodies and acetate by the – of normal and ketonaemic sheep, **259,** 801

Calcium, the effects of very low external – and sodium concentrations on cardiac contractile strength and calcium-sodium antagonism (frog), **259,** 283

calcium current, calcium conductance in relation to contractility in frog myocardium, **259,** 597

Calcium fluxes, kinetics and energetics of calcium efflux from intact squid giant axons, **259,** 103

Calcium pump, calcium-sodium antagonism on the frog's heart: a voltage-clamp study, **259,** 617

Cardiac atrial muscle, the effects of very low external calcium and sodium concentrations cn cardiac contractile strength and calcium-sodium antagonism (frog), **259,** 283

calcium-sodium antagonism on the frog's heart: a voltage-clamp study **259,** 617

Cardiac muscle, calcium conductance in relation to contractility in frog myocardium, **259,** 597

Cardiovascular response, respiratory and cardiovascular interactions in ducks: the effect of lung denervation on the initiation of and recovery from some – to submergence, **259,** 575

Caudate nucleus, caudate stimulation and substantia nigra activity in the rat, **259,** 285

Cell cultures, evidence for genetic control of glycine uptake in –, regulated by the amino acid concentration of the growth medium (HeLa cells, *Xenopus laveis*), **259,** 83

Cerebellar analogue, a molluscan 'cerebellum': parallel fibres and visuomotor control, **259,** 20*P*

Cerebrospinal fluid, regulation of – potassium by the cat choroid plexus, **259,** 213

Chemoreceptors, respiratory modulation of baroreceptor and chemoreceptor reflexes affecting heart rate and cardiac vagal efferent nerve activity (dog), **259,** 523

Chloride flux, the temperature dependence of the movement of potassium and chloride ions associated with nerve impulses (squid), **259,** 145

Choroid plexus, regulation of cerebrospinal fluid potassium by the cat –, **259,** 213

Cochlear nucleus, dynamic properties of the responses of single neurones in the – of the rat, **259,** 63

Colchicine, functional and structural changes in mammalian sympathetic neurones following – application to post-ganglionic nerves (guinea-pig), **259,** 159

Colon, electrical activity of human colonic smooth muscle *in vitro*, **259,** 28*P*

the effect of acetylcholine on the electrical activity of colonic mucosa (rat), **259,** 58*P*

Conduction block, synaptic depression related to presynaptic axon – (crayfish), **259,** 367

Dark adaption, the – curve of rods measured by their after-image, **259,** 491

Data analysis, dynamic properties of the responses of single neurones in the cochlear nucleus of the rat, **259,** 63

Degenerating neurones, a paraffin Nauta method for staining degeneration in cephalopid c.n.s., **259,** 18*P*

Dendrites, relationships between the spike components and the delayed depolarization in cat spinal neurones, **259,** 325

Denervation, post-tetanic effects in denervated rat skeletal muscle, **259,** 45*P*

Denervation diuresis, sensitivity of renin secretion to volume depletion in the anaesthetized dog: comparison between urinary drainage and slow haemorrhage, **259,** 309

Dietary fibre, the effect of unavailable carbohydrate gelling agents in reducing the post-pradial glycaemia in normal volunteers and diabetics. **259,** 52*P*

Divalent cations, effects of the ionophore X-537A on acetylcholine release at the frog neuromuscular junction, **259,** 177

Diving, respiratory and cardiovascular interactions in ducks: the effect of lung denervation on the initiation of and recovery from some cardiovascular responses to submergence, **259,** 575

Dorsal column, the effects of – section on the evoked convulsions induced by catechol administration (rat), **259,** 17*P*

Duodenum, the influence of gastric distension and the duodenal infusate on the pattern of stomach (abomasal) emptying in the pre-ruminant calf, **259,** 445

Electronic micrometer, an – and histogram classifier, **259,** 2*P*

Extraocular muscles, activation of two types of fibres in rat, – **259,** 199

Eye muscle, activation of two types of fibres in rat extraocular muscles, **259,** 199

Fever, evidence that brain prostaglandin synthesis is not essential in – (rabbit), **259,** 239

Food intake, inhibition of – in the rat following complete absorption of glucose delivered into the stomach, intestine or liver, **259,** 501

Ganglion cells, threshold setting by the surround of cat retinal –, **259,** 737

Gastric emptying, the influence of gastric distension and the duodenal infusate on the pattern of stomach (abomasal) emptying in the pre-ruminant calf, **259,** 445

Gastric function, the vagal stimulation of gastric acid, pepsin and motility in the anaesthetized ferret, **259,** 9*P*

Gastric motility, quantitative measurement of – and the effect of 2-deoxy-D-glucose and vagal stimulation in the anaesthetized ferret, **259,** 32*P*

Gastrin, effects of antrectomy or porta-caval shunting on the histamine-storing endocrine-like cells in oxyntic mucosa of rat stomach. A fluorescence histochemical, electron microscopic and chemical study, **259,** 785

Glucose, inhibition of food intake in the rat following complete absorption of – delivered into the stomach, intestine or liver, **259,** 501

the oxidation of –, ketone bodies and acetate by the brain or normal and ketonaemic sheep, **259,** 801

Glycine, evidence for genetic control of – uptake in cultured cells, regulated by the amino acid concentration of the growth medium (HeLa cells, *Xenopus laevis*), **259,** 83

Guanosine 3′:5′-phosphate, investigations of – binding to a protein fraction prepared from rat lung, **259,** 23*P*

Heart, strain sensitivity and directionality in cat atrial mechanoreceptors *in vitro*, **259,** 405

Histamine, H_1 and H_2 – receptors in the pulmonary circulation (cat), **259,** 41*P*

effects of antrectomy or porta-caval shunting on the – storing endocrine-like cells in oxyntic mucosa of rat stomach. A fluorescence histochemical electron microscopic and chemical study, **259,** 785

5-hydroxytryptamine, alterations in amounts and rates of serotonin transported in an axon of the giant cerebral neurone of *Aplysia californica*, **259,** 473

Hypogastric nerve, mechanosensitive afferent units in the – of the cat, **259,** 457

Hypothalamic peptidase activity, the presence of somatostatin-inactivating peptidases in the hypothalamus and other brain areas of the rat, **259,** 50*P*

Hypoxia, management of – in chonic lung disease, **259,** 23*P*

Inhibitory potentials, interactions between inhibitory and excitatory synaptic potentials at a peripheral neurone (guinea-pig), **259,** 647

Insulin, the number of sodium ion pumping sites in skeletal muscle and its modification by – (frog), **259,** 13

Intestinal fluid transport, studies on the action of angiotensin II on rat jejunal fluid transfer, **259,** 33*P*

Intestinal mucosa cells, RNA content of rat small intestinal mucosa following intestinal surgery, **259,** 61*P*

Intestinal potentials, the relationship between intestinal motility and fluctuations in transmural potential difference in the human jejunum, **259,** 29*P*

non-linear modelling of colorectal electrical potentials, **259,** 31*P*

Intestinal transport, lithium transport by the colon of normal and sodium depleted rats, **259,** 759

the effect of lithium on the transport of sodium, potassium and chloride by the colon of normal and sodium depleted rats, **259,** 771

Intestine, sites of autoregulatory escape of blood flow in the mesenteric vascular bed (cat), **259,** 1

use of an opto-isolator in the simultaneous recording of potential differences from two regions of the intestinal tract, **259,** 21*P*

interaction between inhibitory and excitatory synaptic potentials at a peripheral neurone (guinea-pig), **259,** 647

Ionophores, effects of the ionophore X-537A on acetylcholine release at the frog neuromuscular junction, **259,** 177

Juxtaglomerular apparatus, sensitivity of renin secretion to volume depletion in the anaesthetized dog: comparison between urinary drainage and slow haemorrhage, **259,** 309

Ketone bodies, the oxidation of glucose, – and acetate by the brain of normal and ketonaemic sheep, **259,** 801

Kidney, a reduced diuretic effect of prostaglandin E_1 on the phenylbutazone treated dog –, **259,** 42*P*

sensitivity of renin secretion to volume depletion in the anaesthetized dog: comparison between urinary drainage and slow haemorrhage, **259,** 309

Lithium, – transport by the colon of normal and sodium depleted rats, **259,** 759
the effect of – on the transport of sodium, potassium and chloride by the colon of normal and sodium depleted rats **259,** 771
Liver, effects of sympathomimetic amines and ouabain on potassium influx in guinea-pig slices, **259,** 30*P*
Lung, respiratory and cardiovascular interactions in ducks: the effect of – denervation on the initiation of and recovery from some cardiovascular responses to submergence, **259,** 575

Macrophage, the use of the germ-free mouse in the study of – stimulation *in vivo*, **259,** 3*P*
Maculotoxin, an octopus toxin, – selectively blocks sodium current in squid axons, **259,** 427
Mechanoreceptors, strain sensitivity and directionality in cat atrial – *in vitro*, **259,** 405
mechanosensitive afferent units in the hypogastric nerve of the cat, **259,** 457
Medulla oblongata, unit responses in the – of rabbit to changes in local and cutaneous temperature, **259,** 339
Membrane transport, evidence for genetic control of glycine uptake in cultured cells, regulated by the amino acid concentration of the growth medium (HeLa cells, *Xenopus laevis*), **259,** 83
Mesenteric blood flow, sites of autoregulatory escape of blood flow in the mesenteric vascular bed (cat), **259,** 1
Micturition, reflex activation of sympathetic pathways to vesical pathways smooth muscle and parasympathetic ganglia by electrical stimulation to vesical afferents (cat), **259,** 223
Motoneurones, the average common excitation (ACE) potential and its significance (cat), **259,** 36*P*
relationships between the spike components and the delayed depolarization in cat spinal neurones, **259,** 325
statistical fluctuations in charge transfer at Ia synapses on spinal motoneurones (cat), **259,** 665
non-quantal fluctuations and transmission failures in charge transfer at Ia synapses on spinal motoneurones (cat), **259,** 689
the effect of polarizing currents on unitary Ia excitatory post-synaptic potentials evoked in spinal – (cat), **259,** 705
Muscle, adverse effects of Tris hydrochloride a commonly used buffer in physiological media (guinea-pig, rabbit, rat), **259,** 561
Muscle fibres, activation of two types of fibres in rat extraocular muscles, **259,** 199
Muscle spindles, quantitative experimental studies on mammalian – (mouse), **259,** 5*P*
effect of catechol on the discharge of hind-limb – in the anaesthetized rat, **259,** 12*P*
the influence of repetitive antidromic stimulation on the adaptation of – following a stretch (frog), **259,** 38*P*

Nerve, kinetics and energetics of calcium efflux from intact squid giant axons, **259,** 103
Neuromuscular junction, effects of the ionophore X-537A on acetylcholine release in the frog –, **259,** 177
synaptic depressions related to presynaptic axon conduction block (crayfish), **259,** 367
non-uniform probabilities of quantal release at the crayfish –, **259,** 395
Neuromuscular transmission, adverse effects of Tris hydrochloride, a commonly used buffer in physiological media (guinea-pig, rabbit, rat), **259,** 561
Neurones, relationships between the spike components and the delayed depolarization in cat spinal –, **259,** 325
Neutrophil, – function in human malignant disease, **259,** 48*P*
Noradrenaline, studies on – uptake and release in the rat anococcygeus muscle, **259,** 59*P*
Nucleoside transport, – variation in sheep erythrocytes, **259,** 57*P*

Ouabain binding, the number of sodium ion pumping sites in skeletal muscle and its modification by insulin (frog), **259,** 13
stimulation of the sodium pump by azide and high internal sodium: changes in the number of pumping sites and turnover rate (frog), **259,** 33

Pancreatic secretion, the secretion of organic anions by the isolated perfused pancreas of the cat, **259,** 56*P*
Parasympathetic ganglia, reflex activation of sympathetic pathways to vesical pathways smooth muscle and – by electrical stimulation of vesical afferents (cat), **259,** 223

Parathyroid hormone, interactions of guanylnucleotides, – and analogues with chick kidney adenylate cyclase, **259,** 53*P*

Pattern quantification, a stereological approach to –, **259,** 1*P*

Potassium, regulation of cerebrospinal fluid – by the cat choroid plexus, **259,** 213

Potassium flux, the temperature dependence of the movement of potassium and chloride ions associated with nerve impulses (squid), **259,** 145

Potassium influx, effects of sympathomimetic amines and ouabain on – in guinea-pig liver slices, **259,** 30*P*

Practical teaching, slide-tape productions for use in practical classes in Physiology, **259,** 21*P*

Pregnancy, plasma ACTH levels during human –, **259,** 51*P*

Propranolol, β-adrenoreceptor developments in chick brain assessed by (^{3}H) – binding, **259,** 24*P*

Prostaglandin E_1, a reduced diuretic effect of – on the phenylbutazone treated dog kidney, **259,** 42*P*

Prostaglandins, – as possible mediators of tumour-induced bone resorption (man, mouse) **259,** 7*P*

evidence that brain – synthesis is not essential in fever (rabbit) **259,** 239

Pulmonary circulation, H_1 and H_2 histamine receptors in the – (cat), **259,** 41*P*

Pyramidal tract, cortical and pyramidal, influences on rat motoneurones, **259,** 14*P*

Pyrogen, evidence that brain prostaglandin synthesis is not essential in fever (rabbit), **259,** 239

Renin, sensitivity of renin secretion to volume depletion in the anaesthetized dog: comparison between urinary drainage and slow haemorrhage, **259,** 309

Respiratory cycle, respiratory modulation of baroreceptor and chemoreceptor reflexes affecting heart rate and cardiac vagal efferent nerve activity (dog), **259,** 523

Retina, functional characteristics of lateral interactions between rods in the – of the snapping turtle, **259,** 251

Retinal rods, functional characteristics of lateral interactions between rods in the retina of the snapping turtle, **259,** 251

the formation of metarhodopsin in the – of the frog, **259,** 357

Rhodopsin bleaching, the formation of metarhodopsin$_{380}$ in the retinal rods of the frog, **259,** 357

Ribonucleic acid, RNA content of rat small intestinal mucosa following intestinal surgery, **259,** 61*P*

Salivary glands, the role of cyclic 3′, 3′ – adenosine monophosphate (cyclic AMP) in the ability of sympathetic nerve stimulation to enhance growth and secretion in rat – *in vivo*, **259,** 47

Satiety, inhibition of food intake in the rat following complete absorption of glucose delivered into the stomach, intestine or liver, **259,** 501

Servo action, stretch reflex and – in a variety of human muscles, **259,** 531

Skeletal muscle, the number of sodium ion pumping sites in – and its modification by insulin (frog), **259,** 13

stimulation of the sodium pump by azide and high internal sodium: changes in the number of pumping sites and turnover rate (frog), **259,** 33

post-tetanic effects in denervated rat –, **259,** 45*P*

Skin temperature, unit responses in the medulla oblongata of rabbit to changes in local and cutaneous temperature, **259,** 339

Sleep, blood pressure and – in the rat in normotension and in neurogenic hypertension, **259,** 725

Sodium, the effects of very low external calcium and – concentrations on cardiac contractile strength and calcium-sodium antagonism (frog), **259,** 283

calcium-sodium antagonism on the frog's heart: a voltage-clamp study, **259,** 617

the effect of lithium on the transport of –, potassium and chloride by the colon of normal and sodium depleted rats, **259,** 771

Sodium current, an octopus toxin, maculotoxin selectively blocks sodium current in squid axon, **259,** 427

Sodium depletion, lithium transport by the colon of normal and sodium depleted rats, **259,** 759

Sodium pump, the number of sodium ion pumping sites in skeletal muscle and its modification by insulin (frog), **259,** 13

stimulation of the – by azide and high internal sodium: changes in the number of pumping sites and turnover rate (frog), **259,** 33

Stomach, the influence of gastric distension and the duodenal infusate on the pattern of – (abomasal) emptying in the pre-ruminant calf, **259,** 445
effects of antrectomy or portacaval shunting on the histamine-storing endocrine-like cells in oxyntic mucosa of rat –. A fluorescence histochemical, electron microscopic and chemical study **259,** 785
Stretch reflex, – and servo action in a variety of human muscles, **259,** 531
Submucous plexus, interaction between inhibitor and excitatory synaptic potentials at a peripheral neurone (guinea-pig), **259,** 647
Substantia nigra, caudate stimulation and – activity in the rat, **259,** 825
Sympathetic nerve stimulation, the role of cyclic 3′,5′-monophosphate (cyclic AMP) in the ability of – to enhance growth and secretion in rat salivary glands *in vivo* **259,** 47
Sympathetic neurones, functional and structural changes in mammalian – following colchicine application to post-ganglionic nerves (guinea-pig), **259,** 159
Sympathetic reflexes, reflex activation of sympathetic pathways to vesical pathways smooth muscle and parasympathetic ganglia by electrical stimulation of vesical afferents (cat), **259,** 223
Synaptic depression, – related to presynaptic axon conduction block (crayfish), **259,** 367
Synaptic inhibition, interaction between inhibitory and excitatory synaptic potentials in a peripheral neurone (guinea-pig), **259,** 647
Synaptic transmission, statistical fluctuations in charge transfer at Ia synapses on spinal motoneurones (cat), **259,** 665
non-quantal fluctuations and transmission failures in charge transfer at Ia synapses on spinal motoneurones (cat), **259,** 689
the effect of polarizing currents on unitary Ia excitatory post-synaptic potentials evoked in spinal motoneurones (cat), **259,** 705

Temperature, the – dependence of the movement of potassium and chloride ions associated with nerve impulses (squid), **259,** 145
Temperate measurement, a method for the construction of miniature thermal probes suitable for use in small mammals, **259,** 6*P*
Thermoregulation, unit responses in the medulla oblongata of rabbit to changes in local and cutaneous temperatures, **259,** 339
Thumb, stretch reflex and servo action in a variety of human muscles, **259,** 531
Trachea, the distribution of autonomic nerves within the smooth muscle layer of the bovine –, **259,** 48*P*
Transmitter release, does the giant cerebral neurone of *Helix* release two transmitters: ACh and serotonin?, **259,** 44*P*
synaptic depression related to presynaptic axon conduction block (crayfish), **259,** 367
non-uniform probabilities of quantal release at the crayfish neuromuscular junction, **259,** 395
Tris buffer, adverse effects of Tris hydrochloride, a commonly used buffer in physiological media (guinea-pig, rabbit, rat), **259,** 561

Urinary bladder, reflex activation of sympathetic pathways to vesical pathways smooth muscle and parasympathetic ganglia by electrical stimulation of vesical afferents (cat), **259,** 223
mechanosensitive afferent units in the hypogastric nerve of the cat, **259,** 457
Uterine potentials, measurement of transuterine potential difference in the human female during labour, **259,** 25*P*
transuterine transendocervical and transvaginal potential differences in conscious woman measured *in situ*, **259,** 27*P*

Vagus, respiratory modulation of baroreceptor and chemoreceptor reflexes affecting heart rate and cardiac vagal efferent nerve activity (dog), **259,** 523
Vas deferens, observations on the origin of the complex mechanical response to motor nerve stimulation of the rat –, **259,** 54*P*
Ventilation, and effect of respiratory – on erythrocyte sodium, **259,** 39*P*
Vision, contrast thresholds for pattern and movement detection evaluated by evoked potentials, **259,** 34*P*
functional characteristics of lateral interactions between rods in the retina of the snapping turtle, **259,** 251

Vision, the dark adaptation curve of rods measured by their after-image, **259,** 491
threshold setting by the surround of cat retinal ganglion cells, **259,** 737
Visual after-image, the dark adaptation of rods measured by their after-image, **259,** 491
Visual pigments, the formation of metarhodopsin$_{380}$ in the retinal rods of the frog, **259,** 357

Water-electrolyte balance, sensitivity of renin secretion to volume depletion in the anaesthetized dog: comparison between urinary drainage and slow haemorrhage, **259,** 309

CONTENTS OF VOLUME 260

No. 1 *August* 1976

PAGE

Review Lecture. Bayliss–Starling Memorial Lecture 1976. Lymph formation by secretion or filtration? By H. BARCROFT . 1

Calcium exchange in vascular smooth muscle, action of noradrenaline and lanthanum. By T. GODFRAIND 21

The effect of temperature on the reaction of carbon monoxide with oxygenated haemoglobin. By JOHN A. SIRS 37

Energetics of isovolumic contractions of the isolated rabbit heart. By R. L. COULSON 45

The effects of potassium and temperature on the pace-maker current, I_{K_2} in Purkinje fibres. By IRA COHEN, JÜRGEN DAUT and DENIS NOBLE 55

An analysis of the actions of low concentrations of ouabain on membrane currents in Purkinje fibres. By IRA COHEN, JÜRGEN DAUT and DENIS NOBLE 75

Stimulation of $^{45}Ca^{2+}$ efflux from rat pituitary by luteinizing hormone-releasing hormone and other pituitary stimulants. By J. A. WILLIAMS 105

Inotropic effect of cyclic AMP in calf ventricular muscle studied by a cut end method. By R. W. TSIEN and R. WEINGART . . 117

Physiological and morphological effects of post-ganglionic axotomy on presynaptic nerve terminals. By H. R. BRENNER and E. W. JOHNSON 143

Reduction in acetylcholine sensitivity of axotomized ciliary ganglion cells. By H. R. BRENNER and A. R. MARTIN . . . 159

Effects of botulinum toxin on neuromuscular transmission in the rat. By S. G. CULL-CANDY, H. LUNDH and S. THESLEFF . . 177

Stimulation of the rabbit hypothalamus: caudal projections to respiratory and cardiovascular centres. By M. H. EVANS . . 205

Induction of transporting sites in a sodium transporting epithelium. By A. W. CUTHBERT and W. K. SHUM 223

Influence of amygdala stimulation on the activity of identified tuberoinfundibular neurones in the rat hypothalamus. By L. P. RENAUD 237

No. 2 *September* 1976

PAGE

Regeneration of afferent and efferent fibres to muscle spindles after nerve injury in adult cats. By M. C. Brown and R. G. Butler 253

Integrated electromyogram and oxygen uptake during positive and negative work. By Brenda Bigland-Ritchie and Joseph J. Woods 267

Spike initiation by transmembrane current: a white-noise analysis By Hugh L. Bryant and José P. Segundo . . . 279

Changes in electrical properties of rat myometrium during gestation and following hormonal treatments. By H. Kuriyama and H. Suzuki 315

Effects of prostaglandin E_2 and oxytocin on the electrical activity of hormone-treated and pregnant rat myometria. By H. Kuriyama and H. Suzuki 335

α-Adrenergic, β-Adrenergic and cholinergic mechanisms for amylase secretion by rat parotid gland *in vitro*. By Barbara A. Leslie, James W. Putney Jr. and Jane M. Sherman . . 351

The connexion between the ion-binding sites of the sodium pump. By A. R. Chipperfield and R. Whittam 371

Joint sense, muscle sense, and their combination as position sense, measured at the distal interphalangeal joint of the middle finger. By S. C. Gandevia and D. I. McCloskey 387

Lung inflation and alveolar permeability to non-electrolytes in the adult sheep *in vivo*. By E. A. Egan, R. M. Nelson and R. E. Olver 409

An electrophysiological study of the sacral parasympathetic pathway to the colon of the cat. By William C. De Groat and Jacob Krier. 425

Inhibition and facilitation of antidromically identified tuberoinfundibular neurones following stimulation of the median eminence in the rat. By Yukiko Sawaki and Kinji Yagi 447

The interaction between cutaneous and spinal thermal inputs in the control of oxygen consumption in the rat. By Manuel Banet and Herbert Hensel 461

Possible presynaptic inhibition in rat olfactory cortex. By H. G. Pickles and M. A. Simmonds 475

Conduction velocity along the afferent vagal dendrites: a new type of fibre. By R. Duclaux, N. Mei and F. Ranieri . . . 487

No. 3 *September* 1976

PAGE

Increment sensitivity in humans with abnormal visual experience. By B. L. Beyerstein and R. D. Freeman 497

Identification of pathways mediating cardiovascular responses elicited by stimulation of the septum in the rat. By Franco R. Calaresu, John Cirello and Gordon J. Mogenson 515

Drug blockade of open end-plate channels. By P. R. Adams . 531

Conductances, diffusion and streaming potentials in the rat proximal tubule. By Gabriel B. De Mello, Aníbal G. Lopes and Gerhard Malnic 553

Some aspects of foetal and uteroplacental metabolism in cows with indwelling umbilical and uterine vascular catheters. By R. S. Comline and Marian Silver 571

Lithium protection against oxygen toxicity in rats: ammonia and amino acid metabolism. By E. W. Banister, N. M. G. Bhakthan and A. K. Singh 587

Sulphate excretion by dogs following ingestion of ammonium sulphate or meat. By W. J. O'Connor and R. A. Summerhill . 597

Pepsin secretion in the anaesthetized cat and the effect of sympathetic nerve stimulation. By Robin Hooper, J. David Reed and David J. Sanders 609

Progressive enhancement in the secretory functions of the digestive system of the rat in the course of cold acclimation. By E. Harada and T. Kanno 629

The effect of dopamine on neurohypophysial hormone release *in vivo* and from the rat neural lobe and hypothalamus *in vitro*. By T. E. Bridges, E. W. Hillhouse and M. T. Jones 647

Sodium-dependent influx of orthophosphate in mammalian non-myelinated nerve. By Beatrice Anner, J. Ferrero, P. Jirounek, G. J. Jones, A. Salamin and R. W. Straub 667

Stimulation-induced factors which affect augmentation and potentiation of transmitter release at the neuromuscular junction. By K. L. Magleby and Janet E. Zengel 687

The morphology of spinocervical tract neurones in the cat. By A. G. Brown, C. R. House, P. K. Rose and P. J. Snow . . . 719

The secretion of citrate into milk. By The Late J. L. Linzell, T. B. Mepham, and M. Peaker 739

PROCEEDINGS OF THE PHYSIOLOGICAL SOCIETY

5 June 1976

SUBJECT INDEX

Acetylcholine, reduction in – sensitivity of axotomized ciliary ganglion cells (chick) **260,** 159
the effect of dopamine on neurohypophysial hormone release *in vivo* and from the rat neural lobe and hypothalamus *in vitro*, **260,** 647
Adenosine 3′:5′-phosphate, inotropic effect of cyclic AMP in calf ventricular muscle studied by a cut-end method, **260,** 117
Adenosine 3′:5′-phosphate, α-adrenergic, β-adrenergic and cholinergic mechanisms for amylase secretion by rat parotid gland *in vitro*, **260,** 351
Adrenaline, inotropic effect of cyclic AMP in calf ventricular muscle studied by a cut-end method, **260,** 117
α-Methyl-p-tyrosine, inhibition and facilitation of antidromically identified tuberoinfundibular neurones following stimulation of the median eminence in the rat, **260,** 447
Amblyopia, increment sensitivity in humans with abnormal visual experience, **260,** 497
Ammonia, lithium protection against oxygen toxicity in rats: – and amino acid metabolism, **260,** 587
Amygdala, influence of – stimulation on the activity of identified tuberoinfundibular neurones in the rat hypothalmus, **260,** 237
Amylase secretion, α-adrenergic, β-adrenergic and cholinergic mechanisms for – by rat parotid gland *in vitro*, **260,** 351
Analgesia, the C-fragment of lipotropin – a potent analgesic, **260,** 30*P*
Angiotensin II, – release from the hypoxic lobe of the intact dog lung, **260,** 32*P*
Anococcygeus muscle, the action of some vasoactive polypeptides and their antagonist on the –, **260,** 19*P*
Antidiuretic hormone, prostaglandin A_2 infusion restores the water-retaining effect of – in lithium-treated rats, **260,** 60*P*
Arousal, inhibition of thermoregulatory outflow in conscious rabbits during periods of sustained –, **260,** 31*P*
ATPase, a method for the continuous assay of picomole quantities of ADP released from glycerol-extracted skeletal muscle fibres on MgATP activation, **260,** 4*P*
Auditory localization, the detectability of apparent source movement effected by inter-aural phase modulation, **260,** 49*P*
Axotomy, physiological and morphological effects of post-ganglionic – on presynaptic nerve terminals (chick), **260,** 143
reduction in acetylcholine sensitivity of axotomized ciliary ganglion cells (chick), **260,** 159

Barbiturates, drug blockade of open end-plate channels (frog), **260,** 531
Blastocyst, endometrial components involved in protein synthesis by 16-day pig – tissue in culture, **260,** 73*P*
Body temperature, the interaction between cutaneous and spinal thermal inputs in the control of oxygen consumption in the rat, **260,** 461
Botulinum toxin, effects of – on neuromuscular transmission in the rat, **260,** 177

Calcium, stimulation of $^{45}Ca^{2+}$ efflux from rat pituitary by luteinizing hormone-releasing hormone and other pituitary stimulants, **260,** 105
effects of botulinum toxin on neuromuscular transmission in the rat, **260,** 177
α-adrenergic, β-adrenergic and cholinergic mechanisms for amylase secretion by rat parotid gland *in vitro*, **260,** 351
Calcium exchange, – in vascular smooth muscle, action of noradrenaline and lanthanum (rat), **260,** 21
Calcium ionophore, induction of the acrosome reaction in guinea-pig spermatozoa, *in vitro* by the – A23187, **260,** 18*P*
Calcium pump, the effect of membrane potential on the calcium transport systems in squid axons, **260,** 24*P*
Cannulae, a technique for intra-arterial injections into hind limb muscles in conscious mammals, **260,** 1*P*
Capillary pressures, capillary pressures in the fingers and toes, **260,** 57*P*
Carbon dioxide, facilitated transport of CO_2 in rat skeletal muscle, **260,** 35*P*

Carbon monoxide, the effect of temperature on the reaction of – with oxygenated haemoglobin, **260,** 37

Cardiac denervation, effect of – on myocardial oxygen and substrate utilization, **260,** 43*P*

Cardiac muscle, an optical system for measuring length changes in isolated –, **260,** 14*P*

energetics of isovolumic contractions of the isolated rabbit heart, **260,** 45

Cardiac Purkinje fibres, the effects of potassium and temperature on the pacemaker current, I_{K_2}, in Purkinje fibres (sheep), **260,** 55

an analysis of the actions of low concentrations of ouabain on membrane currents in Purkinje fibres (sheep), **260,** 75

Cardiac reflexes, hypothalamic inhibition of vagal component of the sinus nerve –, **260,** 45*P*

Cardiac ventricular muscle, inotropic effect of cyclic AMP in calf ventricular muscle studied by a cut-end muscle, **260,** 117

Cardiovascular response, stimulation of the rabbit hypothalamus: caudal projections to respiratory and cardiovascular centres, **260,** 205

Cardiovascular responses, identification of pathways mediating – elicited by stimulation of the septum in the rat, **260,** 515

Catecholamines, amygdaloid-hypothalamic connexions and –, **260,** 57*P*

Cerebral blood flow, an attempt to measure – in the new-born infant, **260,** 42*P*

Chloride activity, the use of electrodes containing liquid ion-sensitive resin to measure the intracellular – of skeletal muscle, **260,** 6*P*

Ciliary ganglion, physiological and morphological effects of post-ganglionic axotomy on presynaptic nerve terminals (chick), **260,** 143

reduction in acetylcholine sensitivity of axotomized – cells (chick), **260,** 159

Citrate, the secretion of – into milk (goat, guinea-pig), **260,** 739

Cold acclimatization, progressive enhancement in the secretory functions of the digestive system of the rat in the course of –, **260,** 629

Colon, an electrophysiological study of the sacral parasympathetic pathway to the – of the cat, **260,** 425

Conduction velocity, – along the afferent vagal dendrites: a new type of fibre (cat), **260,** 487

Dendrites, the morphology of spinocervical tract neurones in the cat, **260,** 719

Divalent cations, comparative study of – as charge carriers in cardiac membrane, **260,** 22*P*

Dopamine, the effect of – on neurohypophysial hormone release *in vivo* and from the rat neural lobe and hypothalamus *in vitro*, **260,** 647

Electromyography, continuous recording of physiological variables and behaviour in young lambs, **260,** 15*P*

Electrophysiology, conductances, diffusion and streaming potentials in the rat proximal tubule, **260,** 553

End-plate, drug blockade of open – channels (frog), **260,** 531

Epithelium, lung inflation and alveolar permeability to non-electrolytes in the adult sheep *in vivo*, **260,** 409

Erythrocytes, the connexion between the ion-binding sites of the sodium pump, **260,** 371

Exercise, the measurement of leg forces exerted in bicycling by patients with functionally asymmetrical limbs, **260,** 12*P*

Fasting, a note on the maintenance of the blood glucose during –, **260,** 72*P*

Fat absorption, – with failure of postprandial chylomicroanaemia in biliary diversion in man, **260,** 71*P*

Finger, joint sense, muscle sense, and their combination as position sense, measured at the distal interphalangeal joint of the middle –, **260,** 387

Foetal breathing, quantitative analysis of – movements, **260,** 10*P*

Foetal heart, prenatal measurement of human – rate variation, **260,** 9*P*

Foetus, some aspects of foetal and uteroplacental metabolism in cows with indwelling unbilical and uterine vascular catheters, **260,** 571

Fusimotor fibres, regeneration of afferent and efferent fibres to muscle spindles after nerve injury in adult cats, **260,** 253

γ-aminobutyric acid, possible presynaptic inhibition in rat olfactory cortex, **260,** 475

Gastric acid secretion, a quantitative relationship between acid secretion and mucosal 3,5-cyclic AMP in the isolated guinea-pig stomach, **260,** 61*P*

Gastric mucosa, pepsin secretion in the anaesthetized cat and the effect of sympathetic nerve stimulation, **260,** 609

Gastric secretion, progressive enhancement in the secretory functions of the digestive system of the rat in the course of cold acclimatization, **260,** 629

Glycosides, the use of sodium salicylate to counter – toxicity, **260,** 21*P*

Guy's Hospital, Review Lecture. Bayliss–Starling Memorial Lecture 1976. Lymph formation by secretion or filtration? **260,** 1

Haemoglobin, the effect of temperature on the reaction of carbon monoxide with oxygenated –, **260,** 37

Heart, energetics of isovolumic contractions of the isolated rabbit heart, **260,** 45

Heidenhain von R. Review Lecture. Bayliss–Starling Memorial Lecture 1976. Lymph formation by secretion or filtration? **260,** 1

Hypothalamus, stimulation of the rabbit –: caudal projections to respiratory and cardiovascular centres, **260,** 205

influence of amygdala stimulation on the activity of identified tuberoinfundibular neurones in the rat –, **260,** 237

the effect of dopamine on neurohypophysial hormone release *in vivo* and from the rat neural lobe and – *in vitro*, **260,** 647

Hypoxia, the effect of acute and chronic – on thoracic gas volume in the rat, **260,** 38*P*

Interstitial fluid, how does – enter lymphatics in the mesentery?, **260,** 55*P*

Intestinal motility, an electrophysiological study of the sacral parasympathetic pathway to the colon of the cat, **260,** 425

Joint sense, –, muscle sense, and their combination as position sense, measured at the distal interphalangeal joint of the middle finger, **260,** 387

Kidney tubules, conductances, diffusion and streaming potentials in the rat proximal tubule, **260,** 553

Lanthanum, calcium exchange in vascular smooth muscle, action of noradrenaline and – (rat), **260,** 21

effects of – and low sodium on calcium movements and mechanical activity in frog ventricular strips, **260,** 23*P*

Leucocytes, the behaviour of platelets and – in conditions of hypokinetic and anaemic hypoxia, contrasted with the absence of such behaviour in arterial hypoxia, **260,** 33*P*

Lithium, – protection against oxygen toxicity in rats: ammonia and amino acid metabolism **260,** 587

Lung, – inflation and alveolar permeability to non-electrolytes in the adult sheep *in vivo*, **260,** 409

Luteinizing hormone-releasing factor, stimulation of $^{45}Ca^{2+}$ efflux from rat pituitary by – and other pituitary stimulants, **260,** 105

Lymph, Review Lecture. Bayliss–Starling Memorial Lecture 1976. – formation by secretion or filtration? **260,** 1

Mammary gland, the secretion of citrate into milk (goat, guinea-pig), **260,** 739

Meat, sulphate excretion by dogs following ingestion of ammonium sulphate or –, **260,** 597

Median eminence, inhibition and facilitation of antidromically identified tuberoinfundibular neurones following stimulation of the – in the rat, **260,** 447

Membrane properties, changes in electrical properties of rat myometrium during gestation and following hormonal treatments, **260,** 315

Membrane resistance, conductances, diffusion and streaming potentials in the rat proximal tubule, **260,** 553

Metabolism, some aspects of foetal and uteroplacental – in cows with indwelling umbilical and uterine vascular catheters, **260,** 571

Micro-electrodes, conductances, diffusion and streaming potentials in the rat proximal tubule, **260,** 553

Milk, the secretion of citrate into – (goat, guinea-pig), **260,** 739

Motor cortex, a comparison of the responsiveness to peripheral stimuli of pre-central cortical neurones in anaesthetized and conscious monkeys, **260,** 53*P*

Motor unit, changes in the probability of firing of human – following cutaneous stimulation, **260,** 69*P*

Motor units, unit studies in normal human gastrocnemius by microstimulation glycogen depletion, and needle biopsy (film), **260,** 11*P*

Muscle activity, integrated electromyogram and oxygen uptake during positive and negative work, **260,** 267

Muscle fibres, a method for the continuous assay of picomole quantities of ADP released from glycerol-extracted skeletal muscle fibres on MgATP activation, **260,** 4*P*

intracellular pH of mouse soleus muscle, **260,** 25*P*

inward calcium current in twitch muscle fibres of the frog, **260,** 27*P*

Muscle sense, joint sense, –, and their combination as position sense, measured at the distal interphalangeal joint of the middle finger, **260,** 387

Muscle spindle, experimental observations on the sharpness of classification of fusimotor fibres into static and dynamic types, **260,** 68*P*

Muscle spindles, regeneration of afferent and efferent fibres to muscle spindles after nerve injury in adult cats, **260,** 253

Myometrium, some amino acids as myometrial spasmogens, **260,** 62*P*

changes in electrical properties of rat – during gestation and following hormonal treatments, **260,** 315

effects of prostaglandin E_2 and oxytocin on the electrical activity of hormone-treated and pregnant-rat myometria, **260,** 335

Neurohypophysial hormone, the effect of dopamine on – release *in vivo* and from the rat neural lobe and hypothalamus *in vitro*, **260,** 647

Neuromuscular block, drug blockade of open end-plate channels (frog), **260,** 531

Neuromuscular junction, stimulation-induced factors which affect augmentation and potentiation of transmitter release at the – (frog), **260,** 687

Neuromuscular transmission, effects of botulinum toxin on – in the rat, **260,** 177

Neurone morphology, the morphology of spinocervical tract neurones in the cat **260,** 719

Noise analysis, spike initiation by transmembrane current: a white – (*Aplysia californica*), **260,** 279

Non-myelinated nerve, sodium-dependent influx of orthophosphate in mammalian – (rabbit), **260,** 667

Noradrenaline, calcium exchange in vascular smooth muscle, action of – and lanthanum (rat), **260,** 21

Oestradiol, changes in electrical properties of rat myometrium during gestation and following hormonal treatments, **260,** 315

Oestrogen, facilitatory effect of – on the response of immature female rat pituitaries to Gn-RH *in vitro*, **260,** 63*P*

Olfactory cortex, possible presynaptic inhibition in rat –, **260,** 475

Ouabain, an analysis of the actions of low concentrations of – on membrane currents in Purkinje fibres (sheep), **260,** 75

Oxygen, energetics of isovolumic contractions of the isolated rabbit heart, **260,** 45

Oxygen consumption, integrated electromyogram and oxygen uptake during positive and negative work, **260,** 267

the interaction between cutaneous and spinal thermal inputs in the control of – in the rat, **260,** 461

Oxygen toxicity, lithium protection against – in rats: ammonia and amino acid metabolism **260,** 587

Oxytocin, effects of prostaglandin E_2 and – on the electrical activity of hormone-treated and pregnant-rat myometria, **260,** 335

Pace-maker, the effects of potassium and temperature on the – current, I_{K_2}, in Purkinje fibres (sheep), **260,** 55

Pancreatic secretion, progressive enhancement in the secretory functions of the digestive system of the rat in the course of cold acclimatization, **260,** 629

Parasympathetic nerves, an electrophysiological study of the sacral parasympathetic pathway to the colon of the cat, **260,** 425

Parotid gland, α-adrenergic, β-adrenergic and cholinergic mechanisms for amylase secretion by rat – *in vitro*, **260,** 351

Pepsin secretion, – in the anaesthetized cat and the effect of sympathetic nerve stimulation, **260,** 609

Permeability, lung inflation and alveolar permeability to non-electrolytes in the adult sheep *in vivo*, **260,** 409

Phosphate, sodium-dependent influx of orthophosphate in mammalian non-myelinated nerve (rabbit), **260,** 667

Picrotoxin, inhibition and facilitation of antidromically identified tuberoinfundibular neurones following stimulation of the median eminence in the rat, **260,** 447

Pituitary, facilitatory effect of oestrogen on the response of immature female rat pituitaries to Gn-RH *in vitro,* **260,** 63*P*

stimulation of $^{45}Ca^{2+}$ efflux from rat – by luteinizing hormone-releasing hormone and other pituitary stimulants, **260,** 105

Placenta, some aspects of foetal and uteroplacental metabolism in cows with indwelling umbilical and uterine vascular catheters, **260,** 571

Platelets, the behaviour of – and leucocytes in conditions of hypokinetic and anaemic hypoxia, contrasted with the absence of such behaviour in arterial hypoxia, **260,** 33*P*

Potassium, the effects of – and temperature on the pace-maker current, I_{K_2}, in Purkinje fibres (sheep), **260,** 55

the connexion between the ion-binding sites of the sodium pump, **260,** 371

Position sense, joint sense, muscle sense, and their combination as –, measured at the distal interphalangeal joint of the middle finger, **260,** 387

Pregnancy, effects of prostaglandin E_2 and oxytocin on the electrical activity of hormone-treated and pregnant-rat myometria, **260,** 335

Presynaptic inhibition, possible – in rat olfactory cortex, **260,** 475

Prostaglandin E_2, effects of – and oxytocin on the electrical activity of hormone-treated and pregnant-rat myometria, **260,** 335

Pulmonary gas exchange, mechanisms involved in gas-blood CO_2 equilibration in avian lungs, **260,** 36*P*

the effect of anaerobiosis on ventilatory and gas exchange dynamics during sinusoidal exercise, **260,** 40*P*

Pulmonary reflexes, lung reflexes in rabbits with inhibition of pulmonary stretch receptor activity, **260,** 36*P*

Pulmonary stretch receptors, electrical stimulation of vagus nerves can be justified! **260,** 39*P*

Purkinje fibre, simultaneous recording of electrical and mechanical activity in the sheep –, **260,** 17*P*

Radiotelemetry, – of physiological variables in new-born lambs, **260,** 15*P*

Receptors, induction of transporting sites in a sodium transporting epithelium (frog), **260,** 223

Reflex responses, – in human pretibial muscles, **260,** 54*P*

Re-innervation regeneration of afferent and efferent fibres to muscle spindles after nerve injury in adult cats, **260,** 253

Renal excretion, cyclic renal sodium excretion in women: evidence for a further control system mediating renal sodium loss, **260,** 59*P*

sulphate excretion by dogs following ingestion of ammonium sulphate or meat, **260,** 597

Respiration, a method for measuring respiratory responses in the unanaesthetized new-born guinea-pig, **260,** 16*P*

the reflex latency of inspiratory and expiratory responses to an alternate-breath oscillation of alveolar P_{CO_2} in man, **260,** 41*P*

stimulation of the rabbit hypothalamus: caudal projections to respiratory and cardiovascular centres, **260,** 205

Saliva, changes in parotid salivary flow during intracarotid infusion of potassium chloride into conscious sheep, **260,** 70*P*

Secretion, α-adrenergic, β-adrenergic and cholinergic mechanisms for amylase secretion by rat parotid gland *in vitro,* **260,** 351

Septum, identification of pathways mediating cardiovascular responses elicited by stimulation of the – in the rat, **260,** 515

Sexual arousal, objective measures of female –, **260,** 64*P*

Skeletal muscle, the instantaneous elasticity of frog – fibres, **260,** 28*P*

Skeleto-fusimotor fibres, regeneration of afferent and efferent fibres to muscle spindles after nerve injury in adult cats, **260,** 253

Skin, induction of transporting sites in a sodium transporting epithelium (frog), **260,** 223

Sleep, measurement of respiratory exchange and duration of slow-wave – in unanaesthetized rats breathing gas mixtures, **260,** 7*P*

Smooth muscle, calcium exchange in vascular –, action of noradrenaline and lanthanum (rat), **260,** 21

Sodium-dependence, – influx of orthophosphate in mammalian non-myelinated nerve (rabbit), **260,** 667

Sodium-potassium pump, an analysis of the actions of low concentrations of ouabain on membrane currents in Purkinje fibres (sheep), **260,** 75

the connexion between the ion-binding sites of the sodium pump, **260,** 371

Sodium transport, induction of transporting sites in a sodium transporting epithelium (frog), **260,** 223

Spinal cord, the interaction between cutaneous and spinal thermal inputs in the control of oxygen consumption in the rat, **260,** 461

Spinocervical tract, the morphology of – neurones in the cat, **260,** 719

Stretch reflex, absence of the first component of the long-latency human stretch reflex in a thumb muscle when it is used as an antagonist, **260,** 67*P*

Stria medullaris, identification of pathways mediating cardiovascular responses elicited by stimulation of the septum in the rat, **260,** 515

Sulphate, – excretion by dogs following ingestion of ammonium sulphate or meat, **260,** 597

Superior colliculus, afferent input, distribution and collateralization of tectospinal and tectoreticular cells, **260,** 52*P*

Sympathetic nerve stimulation, pepsin secretion in the anaesthetized cat and the effect of –, **260,** 609

Synaptic transmission, spike initiation by transmembrane current: a white-noise analysis (*Aplysia californica*), **260,** 279

Temperature, the effects of potassium and – on the pace-maker current, I_{K_2}, in Purkinje fibres (sheep), **260,** 55

Thermoregulation, the interaction between cutaneous and spinal thermal inputs in the control of oxygen consumption in the rat, **260,** 461

Transmitter release, release and uptake of 5-hydroxytryptamine (5-HT) by a single 5-HT containing neurone, **260,** 29*P*

Transmitter release, physiological and morphological effects of post-ganglionic axotomy on presynaptic nerve terminals (chick), **260,** 143

Transmitter release, stimulation-induced factors which affect augmentation and potentiation of – at the neuromuscular junction (frog), **260,** 687

Tuberoinfundibular neurones, influence of amygdala stimulation on the activity of identified – in the rat hypothalamus **260,** 237

inhibition and facilitation of antidromically identified – following stimulation of the median eminence in the rat, **260,** 447

Vagus, conduction velocity along the afferent vagal dendrites: a new type of fibre (cat), **260,** 487

Vagus nerve, sodium-dependent influx of orthophosphate in mammalian non-myelinated nerve (rabbit), **260,** 667

Vagus nerve stimulation, pepsin secretion in the anaesthetized cat and the effect of sympathetic nerve stimulation, **260,** 609

Vibration, absence of gross action of prolonged – on mouse motor behaviour, **260,** 2*P*

Vision, increment sensitivity in humans with abnormal visual experience, **260,** 497

Visual cortex, the topography of the visual evoked responses to half field stimulation **260,** 46*P*

polar responsiveness of complex cells in cat striate cortex to motion of bars and of textured patterns, **260,** 47*P*

Visual deprivation, increment sensitivity in humans with abnormal visual experience, **260,** 497

Visual field, behavioural, neurophysiological evidence for a nasal – loss in cats reared with monocular convergent squint, **260,** 48*P*

Visual neurones, responses of neurones in the inferotemporal cortex of the monkey, **260,** 50*P*

Visual responses, use of a small computer on-line to examine cerebellar –, **260,** 3*P*

characteristics of responses of units in the cat cerebellar vermis to static visual stimuli, **260,** 66*P*

Work, integrated electromyogram and oxygen uptake during positive and negative –, **260,** 267

CONTENTS OF VOLUME 261

No. 1 *September* 1976

PAGE

The effect of aminoacetonitrile on calcium metabolism and bone in the rat. By J. R. KEMM 1

Oscillations in rod and horizontal cell membrane potential: evidence for feed-back to rods in the vertebrate retina. By RICHARD A. NORMANN and JIŘÍ POCHOBRADSKÝ 15

Action of vinblastine on the spontaneous release of acetylcholine at the frog neuromuscular junction. By MONIQUE PÉCOT-DECHAVASSINE 31

Distribution of fusimotor axons to intrafusal muscle fibres in cat tenuissimus spindles as determined by the glycogen-depletion method. By D. BARKER, FRANÇOISE EMONET-DÉNAND, D. W. HARKER, LENA JAMI and Y. LAPORTE 49

Sensitivity of toad rods: dependence on wave-length and background illumination. By GORDON L. FAIN 71

Changes in membrane currents in bullfrog atrium produced by acetylcholine. By WAYNE GILES and SUSAN J. NOBLE 103

Reversal of the physiological effects of monocular deprivation in the kitten's visual cortex. By J. ANTHONY MOVSHON 125

Reversal of the behavioural effects of monocular deprivation in the kitten. By J. ANTHONY MOVSHON 175

Reversal of the morphological effects of monocular deprivation in the kitten's lateral geniculate nucleus. By M. R. DÜRSTELER, L. J. GAREY and J. A. MOVSHON 189

The effect of noradrenaline, injected into the hypothalamus, on thermoregulation in the cat. By K. E. COOPER, D. L. JONES, Q. J. PITTMAN and W. L. VEALE 211

The effect of noradrenaline and 5-hydroxytryptamine injected into a lateral cerebral ventricle, on thermoregulation in the newborn lamb. By K. E. COOPER, Q. J. PITTMAN and W. L. VEALE . 223

Biphasic changes in body temperature produced by intracerebroventricular injections of histamine in the cat. By WESLEY G. CLARK and H. RICK CUMBY 235

No. 2 *October* 1976

PAGE

The effect of transmural pressure on pumping activity in isolated bovine lymphatic vessels. By N. G. McHale and I. C. Roddie . 255

Adrenal and pancreatic endocrine responses to hypoxia in the conscious calf. By S. R. Bloom, A. V. Edwards, R. N. Hardy and Marian Silver 271

Gastric emptying of organic acids in the dog. By A. L. Blum, J. Hegglin, G. J. Krejs, F. Largiadèr, H. Säuberli and P. Schmid 285

Release of noradrenaline from the cat spleen by nerve stimulation and potassium. By A. G. Garcia, S. M. Kirpekar and P. Sanchez-Garcia 301

Osmotic reflexion coefficients of capillary walls to low molecular weight hydrophilic solutes measured in single perfused capillaries of the frog mesentery. By F. E. Curry, J. C. Mason and C. C. Michel 319

The secretory characteristics of dehydrocholate in the dog: comparison with the natural bile salts. By E. R. L. O'Máille and T. G. Richards 337

The direct effect on pulmonary stretch receptor discharge produced by changing lung carbon dioxide concentration in dogs on cardiopulmonary bypass and its action on breathing. By G. W. Bradley, M. I. M. Noble and Diana Trenchard 359

Respiratory and thermoregulatory responses of rabbits breathing carbon dioxide during heat exposure. By M. Maskrey and S. C. Nicol 375

Polyneuronal innervation of skeletal muscle in new-born rats and its elimination during maturation. By M. C. Brown, J. K. S. Jansen and D. Van Essen 387

The conditions required for the maintenance of binocularity in the kitten's visual cortex. By Colin Blakemore 423

The possible mechanism for the 'fade' in acid gastric secretion during continuous infusions of pentagastrin. By A. K. Sanyal and N. G. Waton. 445

PAGE

Competitive and non-competitive re-innervation of mammalian sympathetic neurones by native and foreign fibres. By DALE PURVES 453

A new method for labelling saxitoxin and its binding to non-myelinated fibres of the rabbit vagus, lobster walking leg, and garfish olfactory nerves. By J. M. RITCHIE, R. B. ROGART and G. R. STRICHARTZ 477

Non-random distribution of cell types in the preoptic and anterior hypothalamic areas. By R. G. DYER, F. ELLENDORFF and N. K. MACLEOD 495

No. 3 *October* 1976

The potentiating influences of insulin on pancreozymin-induced hyperpolarization and amylase release in the pancreatic acinar cell. By T. KANNO and A. SAITO 505

Sialotonin: vasopressor substance in saliva and submandibular gland of the cat. By SUSANNE BARTON, E. KARPINSKI, C. MORIWAKI and M. SCHACHTER 523

Calcium and the control of discrete wave latency in the ventral photoreceptor of *Limulus*. By JOHN M. MARTINEZ, II and RICHARD SREBRO 535

The effects of irritation at various levels of the airway upon tracheal mucus secretion in the cat. By R. J. PHIPPS and P. S. RICHARDSON 563

Asymmetric tonic labyrinth reflexes and their interaction with neck reflexes in the decerebrate cat. By K. W. LINDSAY, T. D. M. ROBERTS and J. R. ROSENBERG 583

The passive permeability of the skin of anuran amphibia: a comparison of frogs (*Rana pipiens*) and toads (*Bufo marinus*). By P. J. BENTLEY and T. YORIO 603

Brain stem afferents to the rat medial septum. By MENAHEM SEGAL 617

Frequency of tendon organ discharges elicited by the contraction of motor units in cat leg muscles. By LENA JAMI and JULIEN PETIT 633

Inhibitory effects of acetylcholine on neurones in the feline nucleus reticularis thalami. By Y. BEN-ARI, R. DINGLEDINE, I. KANAZAWA and J. S. KELLY 647

PAGE

The responses of human muscle spindle endings to vibration of non-contracting muscles. By DAVID BURKE, KARL-ERIK HAGBARTH LARS LÖFSTEDT and B. GUNNAR WALLIN 673

The responses of human muscle spindle endings to vibration during isometric contraction, By DAVID BURKE, KARL-ERIK HAGBARTH, LARS LÖFSTEDT and B. GUNNAR WALLIN . . . 695

YORIO, T. and BENTLEY, P. J. The passive permeability of the skin of anuran amphibia: a comparison of frogs (*Rana pipiens*) and toads (*Bufo marinus*) **261**, 603, 1976

SUBJECT INDEX

Acetylcholine, action of vinblastine on the spontaneous release of – at the frog neuromuscular junction, **261,** 31
changes in membrane currents in bullfrog atrium produced by –, **261,** 103
inhibitory effects of – on neurones in the feline nucleus reticularis thalami, **261,** 647
Adrenal glands, adrenal and pancreatic endocrine responses to hypoxia in the conscious calf, **261,** 271
Amphibian skin, the passive permeability of the skin of anuran amphibia: a comparison of frogs (*Rana pipiens*) and toads (*Bufo marinus*), **261,** 603
Antihistamine, biphasic changes in body temperature produced by intracerebroventricular injections of histamine in the cat, **261,** 235
Atrial muscle, changes in membrane currents in bullfrog atrium produced by acetylcholine, **261,** 103

Bile secretion, the secretory characteristics of dehydrocholate in the dog: comparison with the natural bile salts, **261,** 337
Binocular vision, the conditions required for the maintenance of binocularity in the kitten's visual cortex, **261,** 423
Bone, the effect of aminoacetonitrile on calcium metabolism and – in the rat, **261,** 1
Brain stem, – afferents to the rat medial septum, **261,** 617
Breathing, the direct effect on pulmonary stretch receptor discharge produced by changing lung carbon dioxide concentration in dogs on cardiopulmonary bypass and its action on –, **261,** 359

Calcium, release of noradrenaline from the cat spleen by nerve stimulation and potassium, **261,** 301
– and the control of discrete wave latency in the ventral photo-receptor of *Limulus*, **261,** 535
Calcium metabolism, the effect of amino-acetonitrile on – and bone in the rat, **261,** 1
Capillary permeability, osmotic reflexion coefficients of capillary walls to low molecular weight hydrophilic solutes measured in single perfused capillaries of the frog mesentery, **261,** 319
Carbon dioxide, the direct effect on pulmonary stretch receptor discharge produced by changing lung – concentration in dogs on cardiopulmonary bypass and its action on breathing, **261,** 359
respiratory and thermoregulatory responses of rabbits breathing – during heat exposure, **261,** 375
Cardiopulmonary by-pass, the direct effect on pulmonary stretch receptor discharge produced by changing lung carbon dioxide concentration in dogs on – and its action on breathing, **261,** 359.
Chloride permeability, the passive permeability of the skin of anuran amphibia: a comparison of frogs (*Rana pipiens*) and toads (*Bufo marinus*), **261,** 603

Dehydrocholate, the secretory characteristics of – in the dog: comparison with the natural bile salts, **261,** 337
Development, polyneuronal innervation of skeletal muscle in new-born rats and its elimination during maturation, **261,** 387
the conditions required for the maintenance of binocularity in the kitten's visual cortex, **261,** 423

Fusimotor axons, distribution of – to intrafusal muscle fibres in cat tenuissimus spindles as determined by the glycogen-depletion method, **261,** 49

Gastric emptying, – of organic acids in the dog, **261,** 285
Gastric secretion, the possible mechanism for the 'fade' in acid gastric secretion during continuous infusions of pentagastrin (cat) **261,** 445
Glycogen, distribution of fusimotor axons to intrafusal muscle fibres in cat tenuissimus spindles as determined by the – depletion method, **261,** 49

Heat exposure, respiratory and thermoregulatory responses of rabbits breathing carbon dioxide during –, **261,** 375

Histamine, biphasic changes in body temperature produced by intra-cerebroventricular injections of – in the cat, **261,** 235

Human muscle spindle, the responses of – endings to vibration of non-contracting muscles, **261,** 673

the responses of – endings to vibration during isometric contraction, **261,** 695

5-hydroxytryptamine, the effect of noradrenaline and – injected into a lateral cerebral ventricle, on thermoregulation in the new-born lamb, **261,** 223

the possible mechanism for the 'fade' in acid gastric secretion during continuous infusions of pentagastrin (cat), **261,** 445

Hypothalamic neurones, non-random distribution of cell types in the preoptic and anterior hypothalamic areas (rat), **261,** 495

Hypothalamus, the effect of noradrenaline injected into the –, on thermoregulation in the cat, **261,** 211

non-random distribution of cell types in the preoptic and anterior hypothalamic areas (rat), **261,** 495

Hypoxia, adrenal and pancreatic endocrine responses to – in the conscious calf, **261,** 271

Inhibition, inhibitory effects of acetylcholine on neurones in the feline nucleus reticularis thalami, **261,** 647

Insulin, the potentiating influences of – on pancreozymin-induced hyperpolarization and amylase release in the pancreatic acinar cell, **261,** 505

Labyrinth, asymmetric tonic – reflexes and their interaction with neck reflexes in the decerebrate cat, **261,** 583

Lateral geniculate nucleus, reversal of the morphological effects of mononuclear deprivation in the kitten's –, **261,** 189

Light adaptation, sensitivity of toad rods: dependence on wave-length and background illumination, **261,** 71

Limulus, calcium and the control of discrete wave latency in the ventral photoreceptor of –, **261,** 535

Liver, the secretory characteristics of dehydrocholate in the dog: comparison with the natural bile salts, **261,** 337

Lymphatics, the effects of transmural pressure on pumping activity in isolated bovine lymphatic vessels, **261,** 255

Membrane currents, changes in – bullfrog atrium produced by acetylcholine, **261,** 103

Mesenteric capillaries, osmotic reflexion coefficients of capillary walls to low molecular weight hydrophilic solutes measured in single perfused capillaries of the frog mesentery, **261,** 319

Motoneurones, polyneuronal innervation of skeletal muscle in new-born rats and its elimination during maturation, **261,** 387

Motor units, frequency of tendon organ discharges elicited by the contraction of – in cat leg muscles, **261,** 633

Mucus, the effects of irritation at various levels of the airway upon tracheal – secretion in the cat, **261,** 563

Muscle spindles, distribution of fusimotor axons to intrafusal muscle fibres in cat tenuissimus spindles as determined by the glycogen-depletion method, **261,** 49

the responses of human – endings to vibration of non-contracting muscles, **261,** 673

the responses of human – endings to vibration during isometric contraction, **261,** 695

Neck reflexes, asymmetric tonic labyrinth reflexes and their interaction with – in the decerebrate cat, **261,** 583

Nerve fibres, a new method for labelling saxitoxin and its binding to non-myelinated fibres of the rabbit vagus, lobster walking leg, and garfish olfactory –, **261,** 477

Neuromuscular junction, action of vinblastine on the spontaneous release of acetylcholine at the frog –, **261,** 31

polyneuronal innervation of skeletal muscle in new-born rats and its elimination during maturation, **261,** 387

Noradrenaline, the effect of –, injected into the hypothalamus, on thermoregulation in the cat, **261,** 211

the effect of – and 5-hydroxytryptamine injected into a lateral cerebral ventricle on thermoregulation in the new-born lamb, **261,** 223

release of – from the cat spleen by nerve stimulation and potassium, **261,** 301

Organic acids, gastric emptying of – in the dog, **261,** 285

Osteolathyrogen, the effect of aminoacetonitrile on calcium metabolism and bone in the rat, **261,** 1

Ouabain, the potentiating influences of insulin on pancreozymin-induced hyperpolarization and amylase release in the pancreatic acinar cell, **261**, 505

Pancreas, adrenal and pancreatic endocrine responses to hypoxia in the conscious calf, **261**, 271
the potentiating influences of insulin on pancreozymin-induced hyperpolarization and amylase release in the pancreatic acinar cell, **261**, 505
Pentagastrin, the possible mechanism for the 'fade' in acid gastric secretion during continuous infusions of – (cat), **261**, 445
Photoreceptors, oscillations in rod and horizontal cell membrane potential evidence for feed-back to rods in the vertebrate retina, **261**, 15
calcium and the control of discrete wave latency in the ventral photoreceptor of *Limulus*, **261**, 535
Potassium, release of noradrenaline from the cat spleen by nerve stimulation and –, **261**, 301
Pulmonary stretch receptor, the direct effect on – discharge produced by changing lung carbon dioxide concentration in dogs on cardiopulmonary by-pass and its action on breathing, **261**, 359

Rat, brain stem afferents to the – medial septum, **261**, 617
Reflexion coefficients, osmotic – of capillary walls to low molecular weight hydrophilic solutes measured in single perfused capillaries of the frog mesentery, **261**, 319
Re-innervation, competitive and non-competitive – of mammalian sympathetic neurones by native and foreign fibres (guinea-pig), **261**, 453
Respiration, respiratory and thermoregulatory responses of rabbits breathing carbon dioxide during heat exposure **261**, 375
Respiratory reflexes, the effects of irritation at various levels of the airway upon tracheal mucus secretion in the cat, **261**, 563
Retina, oscillations in rod and horizontal cell membrane potential: evidence for feed-back to rods in the vertebrate –, **261**, 15
sensitivity of toad rods: dependence on wave-length and background illumination, **261**, 72
Rods, sensitivity of toad –: dependence on wave-length and background illumination, **261**, 71
oscillations in rod and horizontal cell membrane potential: evidence for feed-back to – in the vertebrate retina, **261**, 15

Salivary gland, sialotonin: vasopressor substances in saliva and submandibular gland of the cat, **261**, 523
Saxitoxin, a new method for labelling – and its binding to non-myelinated fibres of the rabbit vagus, lobster walking leg, and garfish olfactory nerves, **261**, 477
Septum, brain stem afferents to the rat medial –, **261**, 617
Sialotonin, – vasopressor substances in saliva and submandibular gland of the cat, **261**, 523
Skeletal muscle, polyneuronal innervation of – in new-born rats and its elimination during maturation, **261**, 387
Sodium channels, a new method for labelling saxitoxin and its binding to non-myelinated fibres of the rabbit vagus, lobster walking leg, and garfish olfactory nerves, **261**, 477
Sodium pump, the potentiating influences of insulin on pancreozymin-induced hyperpolarization and amylase release in the pancreatic acinar cell, **261**, 505
Spleen, release of noradrenaline from the cat – by nerve stimulation and potassium, **261**, 301
Stomach, gastric emptying of organic acids in the dog, **261**, 285
Superior cervical ganglion, competitive and non-competitive re-innervation of mammalian sympathetic neurones by native and foreign fibres (guinea-pig), **261**, 453
Sympathetic neurones, competitive and non-competitive re-innervation of mammalian sympathetic neurones by native and foreign fibres (guinea-pig), **261**, 453

Tendon organs, frequency of – discharges elicited by the contraction of motor units in cat leg muscles, **261**, 633
Taurocholate, the secretory characteristics of dehydrocholate in the dog: comparison with the natural bile salts, **261**, 337
Thalamus, inhibitory effects of acetylcholine on neurones in the feline nucleus reticularis thalami, **261**, 647

Thermoregulation, the effect of noradrenaline, injected into the hypothalamus, on – in the cat, **261**, 211
the effect of noradrenaline and 5-hydroxytryptamine injected into a lateral cerebral ventricle, on thermoregulation in the new-born lamb, **261**, 223
biphasic changes in body temperature produced by intracerebroventricular injections of histamine in the cat, **261**, 235
respiratory and thermo-regulatory responses of rabbits breathing carbon dioxide during heat exposure, **261**, 375
Trachea, the effects of irritation at various levels of the airway upon tracheal mucus secretion in the cat, **261**, 563
Transmitter release, action of vinblastine on the spontaneous release of acetylcholine at the frog neuromuscular junction, **261**, 31
Transmural pressure, the effect of – on pumping activity in isolated bovine lymphatic vessels, **261**, 255

Urea permeability, the passive permeability of the skin of anuran amphibia: a comparison of frogs (*Rana pipiens*) and toads (*Bufo marinus*), **261**, 603

Vasopressor substance, sialotonin: – in saliva and submandibular gland of the cat, **261**, 523
Vibration, the responses of human muscle spindle endings to – of non-contracting muscles, **261**, 673
the responses of human muscle spindle endings to – during isometric contraction, **261**, 695
Vinblastine, action of – on the spontaneous release of acetylcholine at the frog neuromuscular junction, **261**, 31
Vision, reversal of the physiological effects of monocular deprivation in the kitten's visual cortex, **261**, 125
reversal of the behavioural effects of monocular deprivation in the kitten, **261**, 175
reversal of the morphological effects of monocular deprivation in the kitten's lateral geniculate nucleus, **261**, 189
the conditions required for the maintenance of binocularity in the kitten's visual cortex, **261**, 423
Visual cortex, reversal of the physiological effects of monocular deprivation in the kitten's visual cortex, **261**, 125
reversal of the behavioural effects of monocular deprivation in the kitten, **261**, 175
the conditions required for the maintenance of binocularity in the kitten's –, **261**, 423
Visual deprivation, reversal of the physiological effects of monocular deprivation in the kitten's visual cortex, **261**, 125
reversal of the behavioural effects of monocular deprivation in the kitten, **261** 174
reversal of the morphological effects of monocular deprivation in the kitten's lateral geniculate nucleus, **261**, 189

Water flow, osmotic reflexion coefficients of capillary walls to low molecular weight hydrophilic solutes measured in single perfused capillaries of the frog mesentery, **261**, 319

CONTENTS OF VOLUME 262

No. 1 *October* 1976

PAGE

The arrangements of collagen fibrils in the iridescent cornea of the scorpion fish, *Taurulus* (*Cottus*) *bubalis*, and the transparency of vertebrate corneal stroma. By J. N. LYTHGOE 1

Relationship between internal calcium and outward current in mammalian ventricular muscle; a mechanism for the control of the action potential duration? By J. B. BASSINGTHWAIGHTE, C. H. FRY and JOHN A. S. MCGUIGAN 15

Effect of regional α- and β-adrenergic blockade on blood flow in the resting forearm during contralateral isometric handgrip. By BRITA EKLUND and LENNART KAIJSER 39

The association of octopamine with specific neurones along lobster nerve trunks. By PETER D. EVANS, EDWARD A. KRAVITZ, BARBARA R. TALAMO and BRUCE G. WALLACE 51

Octopamine release at two points along lobster nerve trunks. by PETER D. EVANS, EDWARD A. KRAVITZ and BARBARA R. TALAMO 71

Central terminations of muscle afferents on motoneurones in the cat spinal cord. By J. F. ILES 91

Functional and morphologic maturation of superficial and juxta-medullary nephrons in the rat. By C. DE ROUFFIGNAC and L. MONNENS 119

Identification of algogenic substances in human erythrocytes. BY TIRZA BLEEHAN, F. HOBBIGER and C. A. KEELE 131

Methionine transport by pig colonic mucosa measured during early post-natal development. By P. S. JAMES and M. W. SMITH . 151

Electrical properties of pig-colonic mucosa measured during early post-natal development. By S. HÉNIN and M. W. SMITH . 169

Properties of the larval neuromuscular junction in *Drosophila melangaster*. By L. Y. JAN and Y. N. JAN 189

L-glutamate as an excitatory transmitter at the *Drosophila* larval neuromuscular junction. By L. Y. JAN and Y. N. JAN . 215

No. 2 *November* 1976

PAGE

Quantitative analysis of retinal ganglion cell classifications. By S. HOCHSTEIN and R. M. SHAPLEY 237

Linear and nonlinear spatial subunits in Y cat retinal ganglion cells. By S. HOCHSTEIN and R. M. SHAPLEY 265

Current–voltage relationships in the crystalline lens. By ROBERT S. EISENBERG and JAMES L. RAE 285

Early and late hind limb vascular responses to stimulation of receptors in the nose of the rabbit. By D. J. ALLISON and D. A. POWIS 301

Properties of a facilitating calcium current in pace-maker neurones of the snail, *Helix pomatia*. By C. B. HEYER and H. D. LUX 319

Control of the delayed outward potassium currents in bursting pace-maker neurones of the snail, *Helix pomatia*. By C. B. HEYER and H. D. LUX 349

The release of endogenous amino acids from the rat visual cortex. By R. M. CLARK and G. G. S. COLLINS 383

The effects of pH changes on the frequency of miniature end-plate potentials at the frog neuromuscular junction. By IRA COHEN and WILLIAM VAN DER KLOOT 401

The effect of local changes in potassium and bicarbonate concentration of hypothalamic blood flow in the rabbit. By I. R. CAMERON and J. CARONNA 415

Atrial receptors in the cat. By C. T. KAPPAGODA, R. J. LINDEN and D. A. S. G. MARY 431

Permeability of individual human erythrocytes to thiourea. By ALFRED W. L. JAY 447

The role of some small peptides in the transfer of amino nitrogen across the wall of vascularly perfused intestine. By C. I. CHEESEMAN and D. S. PARSONS 459

The responses to nerve stimulation of the salivary gland of *Nauphoeta cinerea* Olivier. By B. L. GINSBORG and C. R. HOUSE . 477

On the receptors which mediate the hyperpolarization of salivary gland cells of *Nauphoeta cinerea* Olivier. By B. L. GINSBORG, C. R. HOUSE and E. M. SILINSKY 489

PAGE

Destruction of the sodium conductance inactivation by a specific protease in perfused nerve fibres from *Loligo*. By E. ROJAS and B. RUDY 501

No. 3 *November* 1976

Intracellular pH of single crustacean muscle fibres by the DMO and electrode methods during acid and alkaline conditions. By J. A. M. HINKE and M. R. MENARD 533

Spontaneous subminiature end-plate potentials in mouse diaphragm muscle: evidence for synchronous release. By M. E. KRIEBEL, F. LLADOS and D. R. MATTESON 553

Effects of tetracaine on displacement currents and contraction of frog skeletal muscle. By W. ALMERS and P. M. BEST . . 583

Differential effects of tetracaine on delayed potassium channels and displacement currents in frog skeletal muscle. By W. ALMERS 613

The sources of external work in level walking and running. By G. A. CAVAGNA, H. THYS and A. ZAMBONI 639

Responses of abdominal vascular capacitance in the anaesthetized dog to changes in carotid sinus pressure. By R. HAINSWORTH and F. KARIM 659

Chloride transport in human erythrocytes and ghosts: a quantitative comparison. By JØRGEN FUNDER and JENS OTTO WIETH . 679

Measurement of the conductance of the sodium channel from current fluctuations at the node of Ranvier. By F. CONTI, B. HILLE, B. NEUMCKE, W. NONNER and R. STÄMPFLI 699

Conductance of the sodium channel in myelinated nerve fibres with modified sodium inactivation. By F. CONTI, B. HILLE, B. NEUMCKE, W. NONNER and R. STÄMPFLI 729

Electrical excitability of cultured adrenal chromaffin cells. By BERNARD BIALES, MARC DICHTER and ARTHUR TISCHLER . . 743

Direct measurement of the intracellular pH of mammalian cardiac muscle. By D. ELLIS and R. C. THOMAS 755

SUBJECT INDEX

Action potential, relationship between internal calcium and outward current in mammalian ventricular muscle; a mechanism for the control of the – duration, **262,** 15

Adenyl compounds identification of algogenic substances in human erythrocytes, **262,** 131

Adrenal, electrical excitability of cultured – chromaffin cells (gerbil, human), **262,** 743

Algogenic substances, identification of – in human erythrocytes, **262,** 131

Amino acid release, the release of endogenous amino acids from the rat visual cortex, **262,** 383

Amino nitrogen, the role of some small peptides in the transfer of – across the wall of vascularly perfused intestine, **262,** 459

Athletic performance, the sources of external work in level walking and running, **262,** 639

Atrial receptors, – in the cat, **262,** 431

Bicarbonate, the effect of local changes in potassium and – concentration on hypothalamic blood flow in the rabbit, **262,** 415

Blood flow, effect of regional α- and β-adrenergic blockade on – in the resting forearm during contralateral isometric handgrip, **262,** 39

the effect of local changes in potassium and bicarbonate concentration on hypothalamic – in the rabbit, **262,** 415

Calcium, relationship between internal calcium and outward current in mammalian ventricular muscle; a mechanism for the control of the action potential duration? **262,** 15

effects of tetracaine on displacement currents and contraction of frog skeletal muscle, **262,** 583

Calcium current, properties of a facilitating – in pace-maker neurones of the snail, *Helix pomatia*, **262,** 319

Cardiac muscle, relationship between internal calcium and outward current in mammalian ventricular muscle; a mechanism for the control of the action potential duration? **262,** 15

Cardiac muscle, direct measurement of the intracellular pH of mammalian –, **262,** 755

Carotid sinus baroreceptors, responses of abdominal vascular capacitance in the anaesthetized dog to changes in carotid sinus pressure, **262,** 659

Central blood flow, the effect of local changes in potassium and bicarbonate concentration on hypothalamic blood flow in the rabbit, **262,** 415

Chloride transport, – in human erythrocytes and ghosts: a quantitative comparison, **262,** 679

Chromaffin cells, electrical excitability of cultured adrenal – (gerbil, human), **262,** 743

Cockroach, the responses to nerve stimulation of the salivary gland of *Nauphoeta cinerea* Olivier, **262,** 477

on the receptors which mediate the hyperpolarization of salivary gland cells of *Nauphoeta cinerea* Olivier, **262,** 489

Collagen, the arrangements of – fibrils in the iridescent cornea of the scorpion fish, *Taurulus* (*Cottus*) *bubalis*, and the transparency of vertebrate corneal stroma **262,** 1

Colon, methionine transport by pig colonic mucosa measured, during early post-natal development, **262,** 151

electrical properties of pig colonic mucosa during early post-natal development, **262,** 169

Cornea, the arrangement of collagen fibrils in the iridescent – of the scorpion fish, *Taurulus* (*Cottus*) *bubalis*, and the transparency of vertebrate corneal stroma, **262,** 1

Development, methionine transport by pig colonic mucosa measured during early post-natal –, **262,** 151

electrical properties of pig colonic mucosa measured during early post-natal development, **262,** 169

Displacement currents, effects of tetracaine on – and contraction of frog skeletal muscle, **262,** 583

differential effects of tetracaine on delayed potassium channels and displacement currents in frog skeletal muscle, **262,** 613

Dopamine, on the receptors which mediate the hyperpolarization of salivary gland cells of *Nauphoeta cinerea* Olivier, **262,** 489

Drosophila, properties of the larval neuromuscular junction in – *melanogaster,* **262,** 189

L-glutamate as an excitatory transmitter at the – larval neuro-muscular junction, **262,** 215

End plate potentials, the effects of pH changes on the frequency of miniature – at the frog neuromuscular junction, **262,** 401

Epithelium, electrical properties of pig colonic mucosa measured during early post-natal development, **262,** 169

Erythrocytes, identification of algogenic substances in human –, **262,** 131

permeability of individual human – to thiourea, **262,** 447

chloride transport in human – and ghosts: a quantitative comparison, **262,** 679

Exercise, the sources of external work in level walking and running, **262,** 639

Facilitation, properties of a facilitating calcium current in pace-maker neurones of the snail, *Helix pomatia,* **262,** 319

Glomerular filtration rate, functional and morphologic maturation of superficial and juxtamedullary nephrons in the rat, **262,** 119

Haemolysis, permeability of individual human erythrocytes to thiourea, **262,** 447

Heart, direct measurement of the intracellular pH of mammalian cardiac muscle, **262,** 755

Hydrogen ion pump, intracellular pH of single crustacean muscle fibres by the DMO and electrode methods during acid and alkaline conditions, **262,** 533

Intestine, the role of some small peptides in the transfer of amino nitrogen across the wall of vascularly perfused –, **262,** 459

Lens, current–voltage relationships in the crystalline –, **262,** 285

L-glutamate, – as an excitatory transmitter at the *Drosophila* larval neuromuscular junction, **262,** 215

Lobster, the association of octopamine with specific neurones along – nerve trunks, **262,** 51

octopamine release at two points long – nerve trunks, **262,** 71

Membrane permeability, permeability of individual human erythrocytes to thiourea **262,** 447

Methionine, – transport by pig colonic mucosa measured during early post-natal development, **262,** 151

Motoneurones, central terminations of muscle afferents on – in the cat spinal cord, **262,** 91

Muscle, intracellular pH of single crustacean – fibres by the DMO and electrode methods during acid and alkaline conditions, **262,** 533

effects of tetracaine on displacement currents and contraction of frog skeletal –, **262,** 583

differential effects of tetracaine on delayed potassium channels and displacement currents in frog skeletal –, **262,** 613

Muscle afferents, central terminations of – on motoneurones in the cat spinal cord, **262,** 91

Muscle contraction, effect of regional α- and β-adrenergic blockade on blood flow in the resting forearm during contralateral isometric handgrip, **262,** 39

Nasal mucosa stimulation, early and late hind limb vascular responses to stimulation of receptors in the nose of the rabbit, **262,** 301

Nephron maturation, functional and morphologic maturation of superficial and juxtamedullary nephrons in the rat, **262,** 119

Nerve, measurement of the conductance of the sodium channel from current fluctuations at the node of Ranvier (frog), **262,** 699

conductance of the sodium channel in myelinated – fibres with modified sodium inactivation (frog), **262,** 729

Nerve stimulation, the responses to – of the salivary gland of *Nauphoeta cinerea* Olivier, **262,** 477

Neuromuscular junction, properties of the larval – in *Drosophila melanogaster,* **262,** 189

L-glutamate as an excitatory transmitter at the *Drosophila* larval –, **262,** 215

the effects of pH changes on the frequency of miniature end-plate potentials at the frog-, **262,** 401

Neuromuscular transmission, spontaneous subminiature end-plate potentials in mouse diaphragm muscle: evidence for synchronous release, **262,** 553

Neurosecretion, octopamine release at two points along lobster nerve trunks, **262,** 71

Octopamine, the association of – with specific neurones along lobster nerve trunks, **262,** 51

– release at two points along lobster nerve trunks, **262,** 71

Peptides, the role of some small – in the transfer of amino nitrogen across the wall of vascularly perfused, intestine **262,** 459

Perfused axon, destruction of the sodium conductance inactivation by a specific protease in perfused nerve fibres from *Loligo*, **262,** 501

pH, the effects of – changes on the frequency of miniature end-plate potentials at the frog neuromuscular junction, **262,** 401

intracellular – of single crustacean muscle fibres by the DMO and electrode methods during acid and alkaline conditions, **262,** 533

direct measurement of the intracellular – of mammalian cardiac muscle, **262,** 755

Phenolamine, the association of octopamine with specific neurones along lobster nerve trunks, **262,** 51

Potassium, the effect of local changes in – and bicarbonate concentration on hypothalamic blood flow in the rabbit, **262,** 415

Potassium channels, differential effects of tetracaine on delayed potassium channels and displacement currents in frog skeletal muscle, **262,** 613

Potassium current, control of the delayed outward – in bursting pacemaker neurones of the snail, *Helix pomatia*, **262,** 349

Protease, destruction of the sodium conductance inactivation by a specific – in perfused nerve fibres from *Loligo*, **262,** 501

Ranvier node, measurement of the conductance of the sodium channel from current fluctuations at the node of Ranvier (frog), **262,** 699

conductance of the sodium channel in myelinated nerve fibres with modified sodium inactivation (frog), **262,** 729

Receptive fields, quantitative analysis of retinal ganglion cell classification, **262,** 237

linear and nonlinear spatial subunits in Y cat retinal ganglion cells, **262,** 265

Retinal ganglion cells, quantitative analysis of – classification, **262,** 237

linear and non-linear spatial subunits in Y cat retinal ganglion cells, **262,** 265

Salivary gland, the responses to nerve stimulation of the – of *Nauphoeta cinerea* Olivier, **262,** 477

on the receptors which mediate the hyperpolarization of – cells of *Nauphoeta cinerea* Olivier, **262,** 489

Sensory receptors, atrial receptors in the cat, **262,** 431

Snail neurones, properties of a facilitating calcium current in pace-maker neurones of the snail, *Helix pomatia*, **262,** 319

control of the delayed outward potassium currents in bursting pace-maker neurones of the snail, *Helix pomatia*, **262,** 349

Spinal cord, central terminations of muscle afferents on motoneurones in the cat –, **262,** 91

Sodium channel, measurement of the conductance of the – from current fluctuations at the node of Ranvier (frog), **262,** 699

conductance of the – in myelinated nerve fibres with modified sodium inactivation (frog), **262,** 729

Sodium inactivation, destruction of the sodium conductance inactivation by a specific protease in perfused nerve fibres from *Loligo*, **262,** 501

Sympathetic stimulation, responses of abdominal vascular capacitance in the anaesthetized dog to changes in carotid sinus pressure, **262,** 659

Sympatho-adrenal reflexes, early and late hind limb vascular responses to stimulation of receptors in the nose of the rabbit, **262,** 301

Synaptic organization, central terminations of muscle afferents on motoneurones in the cat spinal cord, **262,** 91

Tetracaine, effects of – on displacement currents and contraction of frog skeletal muscle, **262,** 583

differential effects of – on delayed potassium channels and displacement currents in frog skeletal muscle, **262**, 613

Thiourea, permeability of individual human erythrocytes to –, **262**, 447

Transmitter, L-glutamate as an excitatory – at the *Drosophila* larval neuromuscular junction, **261**, 215

on the receptors which mediate the hyperpolarization of salivary gland cells of *Nauphoeta cinerea* Olivier, **262**, 489

Transparency, the arrangements of collagen fibrils in the iridescent cornea of the scorpion fish, *Taurulus* (*Cottus*) *bubalis*, and the – of vertebrate corneal stroma, **262**, 1

Vascular capacitance, responses of abdominal – in the anaesthetized dog to changes in carotid sinus pressure, **262**, 659

Vascular resistance, early and late hind limb vascular responses to stimulation of receptors in the nose of the rabbit, **262**, 301

Vasodilatation, effect of regional α- and β-adrenergic blockade on blood flow in the resting forearm during contralateral isometric handgrip, **262**, 39

Vision, quantitative analysis of retinal ganglion cell classifications, **262**, 237

linear and nonlinear spatial sub-units in Y cat retinal ganglion cells, **262**, 265

Visual cortex, the release of endogenous amino acids from the rat –, **262**, 383

Voltage clamp, properties of a facilitating calcium current in pace-maker neurones of the snail, *Helix pomatia*, **262**, 319

control of the delayed outward potassium currents in bursting pace-maker neurones of the snail, *Helix pomatia*, **262**, 349

destruction of the sodium conductance inactivation by a specific protease in perfused nerve fibres from *Loligo*, **262**, 501

CONTENTS OF VOLUME 263

No. 1 *December* 1976

PAGE

Review Lecture. Chance and design in electrophysiology: an informal account of certain experiments on nerve carried out between 1934 and 1952. By A. L. HODGKIN 1

A short history of the Physiological Society 1926–1976. By W. F. BYNUM 23

No. 2 *December* 1976

Transient inward current underlying arrhythmogenic effects of cardiotonic steroids in Purkinje fibres. By W. J. LEDERER and R. W. ISLEN 73

Sugars and sugar derivatives which inhibit the short-circuit current of the everted small intestine of the rat. By I. W. MUFLIH and W. F. WIDDAS 101

The viscosity of mammalian nerve axoplasm measured by electron spin resonance. By R. A. HAAK, F. W. KLEINHANS and S. OCHS . 115

Manganese-dependent propagated action potentials and their depression by electrical stimulation in guinea-pig myocardium perfused by sodium-free media. By RIKUO OCHI 139

Afferent sympathetic nerve fibres with aortic endings. By A. MALLIANI and M. PAGANI 157

Influence of the sodium pump on intercellular communication in heart fibres; effect of intracellular injection of sodium ion on electrical coupling. By WALMOR C. DE MELLO 171

The force generated by a visceral smooth muscle. By GIORGIO GABELLA 199

An evaluation of the membrane constants and the potassium conductance in metabolically exhausted muscle fibres. By R. FINK and H. C. LÜTTGAU 215

Spatial properties of horizontal cell responses in the turtle retina. By T. D. LAMB 239

The relation between intercellular coupling and electrical noise in turtle photoreceptors. By T. D. LAMB and the late E. J. SIMON . 257

PAGE

Potential difference and the distribution of ions across the human red blood cell membrane: a study of the mechanism by which the fluorescent cation, diS-C_3-(5) reports membrane potential. By S. B. Hladky and T. J. Rink 287

No. 3 *December* 1976

On the analysis of nerve signals deduced from metacontrast experiments with human observers. By Brian A. Wandell . . 321

Circadian and other rhythmic activity of neurones in the ventromedial nuclei and lateral hypothalamic area. By Kiyomi Koizumi and H. Nishino 331

Short-term synchronization of intercostal motoneurone activity. By T. A. Sears and D. Stagg 357

An analysis of the influence of membrane potential and metabolic poisoning with azide on the sodium pump in skeletal muscle. By L. A. Beaugé and R. A. Sjodin 383

The distribution of GABA sensitivity on crayfish muscle receptor organs. By William Craelius 405

Action potentials in the rat chromaffin cell and effects of acetylcholine. By B. L. Brandt, S. Hagiwara, Y. Kidokoro and S. Miyazaki 417

Cyclic adenosine 3,5-monophosphate in cerebrospinal fluid during thermoregulation and fever. By M. J. Dascombe and A. S. Milton 441

Behaviour and aeration of the respiratory system in the domestic fowl embryo. By Margaret A. Vince 465

The Bohr effect on the reaction of carbon monoxide with fully oxygenated haemoglobin. By John A. Sirs 475

Physiological properties and receptive fields of mechanosensory neurones in the head ganglion of the leech: comparison with homologous cells in segmental ganglia. By King-Wai Yau . . . 489

Receptive fields, geometry and conduction block of sensory neurones in the central nervous system of the leech. By King-Wai Yau 513

PAGE

The thermal sensitivity of the polymodal nociceptors in the monkey. By SYLVIANE CROZE, ROLAND DUCLAUX and DAN R. KENSHALO 539

The bicarbonate ion pump in the endothelium which regulates the hydration of rabbit cornea. By STUART HODSON and FRANCES MILLER 563

PROCEEDINGS OF THE PHYSIOLOGICAL SOCIETY

2–3 July 1976

HISTORICAL DEMONSTRATIONS

SUBJECT INDEX

Acetylcholine, effects of procaine on voltage relaxation of – induced currents in *Aplysia* neurones, **263,** 121*P*
action potentials in the rat chromaffin cell and effects of –, **263,** 417
Acetylcholinesterase, – activity in blood vessels of the guinea-pig ovary, **263,** 101*P*
– in perfusates of the cat's cerebral ventricles, **263,** 165*P*
Action potentials, manganese-dependent propagated – and their depression by electrical stimulation in guinea-pig myocardium perfused by sodium-free media, **263,** 139
– in the rat chromaffin cell and effects of acetylcholine, **263,** 417
Airway conductance, the effect of gestational age and post-natal maturation on specific – during infancy, **263,** 172*P*
Amino acids, ionic dependency of ventral root responses to excitatory – in isolated spinal cord of frog and rat, **263,** 122*P*
competition between some neutral – for carrier-mediated transport into the brain *in vivo*, **263,** 206*P*
γ-aminobutyric acid, the distribution of – sensitivity on crayfish muscle receptor organs, **263,** 405
Ammonia, the metabolic effects of liver destruction in the rat, **263,** 255*P*
Amnion, chloride transport across sheep and guinea-pig –, **263,** 282*P*
Amniotic fluid, method for demonstrating difference between surface properties of sheep and human –, and attempting to predict human respiratory distress syndrome **263,** 110*P*
Angiotensin, drinking induced by – in the pigeon *Columba livia*, **263,** 193*P*
peptide specificity of receptors for – induced thirst in the pigeon *Columba livia*, **263,** 252*P*
Ant, searching procedure in an – (*Cataglyphis bicolor* Fab.), **263,** 268*P*
Aortic receptors, afferent sympathetic nerve fibres with aortic endings, **263,** 157
Arrhythmia, transient inward current underlying arrhythmogenic cardiotonic steroids in Purkinje fibres, **263,** 73
some factors influencing the vulnerability to an induced ventricular arrhythmia in the isolated rat heart, **263,** 247*P*
Artery, some ultrastructural aspects of rat renal – and abdominal aorta, **263,** 106*P*
ATPase, renal $(Na^+ + K^+)$-ATPase: dependence of the optimum pH on the purity of the ATP, **263,** 210*P*
intestinal metaplasia: biochemical aspects, **263,** 279*P*
some characteristics of the noradrenaline activated ATPases of cerebral synaptic membranes, **263,** 246*P*
Auditory system, random modulation and channels in the human – concerned with the detection of modulation in frequency modulated tones, **263,** 167*P*
Axonal transport, effect of axotomy on rapid – of phospholipids in peripheral nerve of the rat, **263,** 200*P*
Axoplasm, the viscosity of mammalian nerve – measured by electron spin resonance, **263,** 115

J. Barcroft, film showing – demonstrating apparatus for determining the dissociation curve of blood, and its use, **263,** 87*P*
films made by – during his research on foetal physiology, **263,** 88*P*
Bicarbonate, the – ion pump in the endothelium which regulates the hydration of rabbit cornea, **263,** 563
Blood–brain barrier, effects of active transport inhibitors and 3M urea on potassium movements in the central nervous system of the crayfish, **263,** 199*P*
Bohr effect, the – on the reaction of carbon monoxide with fully oxygenated haemoglobin, **263,** 475

Calcium current, incomplete inactivation of the slow inward current in cardiac Purkinje fibres, **263,** 127*P*
Cannulation, a simple and effective ruminal – technique for sheep, **263,** 233*P*
Carbon monoxide, the Bohr effect on the reaction of – with fully oxygenated haemoglobin, **263,** 475.
Carbonic anhydrase, the bicarbonate ion pump in the endothelium which regulates the hydration of rabbit cornea, **263,** 563

Cardiac action potential, effect of extracellular divalent cations and EGTA on action potential duration in heart, **263,** 128*P*

Cardiac muscle, manganese-dependent propagated action potentials and their depression by electrical stimulation in guinea-pig myocardium perfused by sodium-free media, **263,** 139

influence of the sodium pump on intercellular communication in heart fibres; effect of intracellular injection of sodium ion on electrical coupling, **263,** 171

effects of modifications of the extracellular potassium concentration on excitation contraction coupling in frog atrial fibres, 263, 249*P*

Cardiac output, an extrapolating analogue computer for measurement of – by thermodilution, **263,** 108*P*

Cardiovascular reflex, influence of rate of pressure change upon human carotid baroreflex responses, 263, 264*P*

cardiovascular responses to distension of the pulmonary arteries in the anaesthetized dog, **263,** 271*P*

Carotid chemoreceptor, – responses to sympathetic excitation, **263,** 267*P*

Carotid sinus, the relation between – dimension, nerve activity and pressure in the anaesthetized greyhound, **263,** 156*P*

comparison of the mechanical properties of the – and adjacent common carotid artery, and the effects of noradrenaline, **263,** 266*P*

Cell death, cell deletion in the mucosa of the rat small intestine, **263,** 197*P*

Cell nucleus, the index of inhomogeneity of human cell nuclei in relation to the degree of flattening, **263,** 111*P*

Cerebellum, the impact of brain stem and – on spinal reflex in the dogfish *Scyliorhinus canicula*, **263,** 203*P*

Cerebral cortex, different flow thresholds for failure of evoked response and increase in extracellular potassium activity during progressive ischaemia in cerebral cortex, **263,** 139*P*

an after-effect of local stimulation of neurones in the – of the unanaesthetized rat, **263,** 140*P*

Choroid plexus, the sodium-dependent absorption of sugars across the – of the sheep, **263,** 274*P*

Chromaffin cell, action potentials in the rat – and effects of acetylcholine, **263,** 417

Circadian rhythms, circadian and other rhythmic activity of neurones in the ventromedial nuclei and lateral hypothalamic area, **263,** 331

Claude Bernard, an experiment of – on curare: the origins of the physiological Society, **263,** 26*P*

the experimental notebooks of –, **263,** 37*P*

Collagenase, collagenolytic activity in peritoneal eosinophils from rats, **263,** 242*P*

Colon, an investigation of the permeability of the rabbit –, **263,** 275*P*

Colour vision, some demonstrations on colour, **263,** 58*P*

colour coding in the superior temporal sulcus of the rhesus monkey, **263,** 169*P*

Cornea, the bicarbonate ion pump in the endothelium which regulates the hydration of rabbit –, **263,** 563

Cortical neurones, enhancement of a phase of reduced firing in the response of spontaneously active – to somatic stimulation **263,** 262*P*

Cuneate nucleus, a superfusion technique for isotope efflux studies and concurrent electrophysiological investigation in the rat –, **263,** 231*P*

Cutaneous afferent fibre, the morphology of identified – collaterals in the spinal cord, **263,** 132*P*

Cutaneous nociceptors, the thermal sensitivity of the polymodal nociceptors in the monkey, **263,** 539

Cyclic adenosine monophosphate, cyclic adenosine 3,5-monophosphate in cerebrospinal fluid during thermoregulation and fever, **263,** 441

Diazepam, the effect of – on performance and emotional response during viva examination, **263,** 191*P*

Donnan potential, potential difference and the distribution of ions across the human red blood cell membrane: a study of the mechanism by which the fluorescent cation, diS-C_3-(5) reports membrane potential, **263,** 287

Dopamine, the effect of adrenergic and dopamine-receptor blockade on the kallikrein and renal response to intra-arterial infusion of – in dogs, **263,** 150*P*

Dopamine receptors, pharmacology of – in the central nervous system of *Planorbis corneus* **263,** 250*P*

Dudgeon, Dr Dudgeon's sphygmograph, 263, 81*P*

Einthoven, the – string galvanometer and the interpretation of the T wave of the electrocardiogram, **263,** 67*P*

Electrical coupling, influence of the sodium pump on intracellular communication in heart fibres; effect of intracellular injection of sodium ion of –, **263,** 171

spatial properties of horizontal cell responses in the turtle retina, **263,** 239

the relation between intercellular coupling and electrical noise in turtle photoreceptors, **263,** 257

Electrical noise, the relation between intercellular coupling and – in turtle photoreceptors, **263,** 257

Electron spin resonance, the viscosity of mammalian nerve axoplasm measured by –, **263,** 115

Electrophysiology, early research on –, **263,** 56*P*

a capillary electrometer, **263,** 64*P*

George Eliot, George Henry Lewes, –, and the Physiological Society, **263,** 45*P*

Embryonic respiration, behaviour and aeration of the respiratory system in the domestic fowl embryo, **263,** 465

End-plate currents, the effect of dithiothreitol on the time course of – in the presence of neostigmine, **263,** 119*P*

Enzyme secretion, scorpion venom-induced – in rat pancreatic slices, **263,** 256*P*

Epididymis, epithelial membrane potentials of the – in rats, **263,** 280*P*

Erythrocytes, pH changes in human – reported by 3,3′ dipropylthiadicarbocyanine, diS-C_3-(5), **263,** 213*P*

potential difference and the distribution of ions across the human red blood cell membrane: a study of the mechanism by which the fluorescent cation, diS-C_3-(5) reports membrane potential, **263,** 287

Exercise, training in hypoxia: effects on – tolerance in normoxia and hypoxia, **263,** 228*P*

Eye tremor, the effect of age and eye position on the normal ocular microtremor record, **263,** 260*P*

Fatigue, an evaluation of the membrane constants and the potassium conductance in metabolically exhausted muscle fibres, **263,** 215

Fever, cyclic adenosine 3,5-monophosphate in cerebrospinal fluid during thermoregulation and –, **263,** 441

Fluid transport, – by the gall-bladder epithelium of *Necturus*, **263,** 201*P*

Fluorescent dye, potential difference and the distribution of ions across the human red blood cell membrane: a study of the mechanism by which the fluorescent cation diS-C_3-(5) reports membrane potential, **263,** 287

W. H. Gaskell, W. H. Gaskell's demonstration of 'the electrical changes in the quiescent cardiac muscle which accompany stimulation of the vagus nerve', **263,** 60*P*

Gastric acid secretion, the effect of pentagastrin-stimulated acid secretion on histamine catabolic enzymes in the gastric mucosa of the cat and guinea-pig, **263,** 220*P*

Gastric motility, inhibition of single vagal afferent fibres by gastric distension in the rat, **263,** 219*P*

the discharges of splanchnic nerve afferents in dogs with intact abdomen, **263,** 221*P*

in vitro acid secretion and motility of non-perfused mammalian gastric wall in response to gastrin and related stimuli, **263,** 222*P*

Gastrin, circulating – variants in the cat, **263,** 194*P*

Gating current, digital processing of ionic and – records, **263,** 112*P*

effect of pulse duration on the off-response of the –, **263,** 125*P*

L-glutamate, aequorin-light and tension responses following the external application of –, **263,** 162*P*

Gut, the effect of reversed jejunal segments on the myoelectrical activity of the small bowel, **263,** 276*P*

Haemoglobin, the Bohr effect on the reaction of carbon monoxide with fully oxygenated –, **263,** 475

J. S. Haldane, J. S. Haldane's realization of the significance for the arterial O_2 content of the ventilation–perfusion ratio, **263,** 80*P*

Hepatocytes, regulation of hormone efficacy in isolated – by the intracellular redox state acting on cyclic AMP phosphodiesterase **263,** 175*P*

High altitude, physiology on Mount Everest (1953) and on the preparatory expedition to Mount Cho Oyu 1952: a demonstration of equipment and results, **263,** 95*P*

A. V. Hill, A. V. Hill's instruments for measuring temperature change in muscle and nerve, **263,** 85*P*

Hippocampus, responsiveness of units of the hippocampal region of cats, **263,** 138*P*

Histamine, – and its metabolites in cat portal venous blood and intestine after duodenal instillation of histamine, **263,** 273*P*

Horizontal cells, spatial properties of horizontal cell responses in the turtle retina, **263,** 239

T. H. Huxley, – and the development of physiology in Britain, **263,** 41*P*

Hypophysectomy, a cryosurgical technique for – of the foetal lamb, **263,** 116*P*

Hypothalamic neurones, effects of gonadotrophic hormones on –. Further complications **263,** 177*P*

Hypothalamus, efferent pathways from lateral hypothalamic neurones, **263,** 131*P*

renal electrolyte excretion following injection of carbachol, noradrenaline and 5-hydroxytryptamine into the lateral cerebral ventricle of conscious sheep, **263,** 188*P*

circadian and other rhythmic activity of neurones in the ventromedial nuclei and lateral hypothalamic area, **263,** 331

Hypoxaemia, post-operative – and oxygen therapy, **263,** 257*P*

Ileum, theophylline-induced fluid and electrolyte secretion by rabbit – results from negative anomalous osmotic flow across the tight-junction, **263,** 195*P*

Impotence, the body-borne tape-recorder as a basis for the domiciliary investigation of – in man, **263,** 105*P*

Inhibition, a depolarizing inhibitory postsynaptic potential in mammalian brain slices, **263,** 120*P*

the distribution of GABA sensitivity on crayfish muscle receptor organs, **263,** 404

Intestinal potential, the effects of transportable ('blockers') and non-transportable inhibitors ('lockers') on rat transjejunal potential difference *in vivo*, **263,** 226*P*

Intestine, sugars and sugar derivatives which inhibit the short-circuit current of the everted small – of the rat, **263,** 101

Kidney, renal excretion of ammonium and of creatinine: relation to age and to body size in the male, **263,** 254*P*

Kidney tubule, application of micropuncture techniques to the kidney of the lamb, **263,** 102*P*

Krogh, Krogh's micro-tonometer, **263,** 79*P*

Leech, physiological properties and receptive fields of mechanosensory neurones in the head ganglion of the –: comparison with homologous cells in segmental ganglia, **263,** 489

receptive fields, geometry and conduction block of sensory neurones in the central nervous system of the –, **263,** 513

George Henry Lewes, –, George Eliot and the Physiological Society, **263,** 45*P*

Sir Thomas Lewis, – (1881–1945), **263,** 72*P*

Lucas, the – pendulum, 263, 83*P*

Lung ventilation, behaviour and aeration of the respiratory system in the domestic fowl embryo, **263,** 465

Mackenzie, Mackenzie's polygraph for simultaneous recordings of venous and arterial pulse, **263,** 70*P*

Manganese, – dependent propagated action potentials and their depression by electrical stimulation in guinea-pig myocardium perfused by sodium-free media, **263,** 139

B. H. C. Matthews, B. H. C. Matthews' 1928 demonstration on the frog skin-muscle–nerve preparation, **263,** 87*P*

Medullary reticular formation, inhibition of the baroreceptor input to cardiac vagal preganglionic neurones by stimulation of the –, **263,** 152*P*

Membrane potentials, potential difference and the distribution of ions across the human red blood cell membrane: a study of the mechanism by which the fluorescent cation, diS-C_3-(5) reports –, **263,** 287

Metabolic rate, oxygen consumption related to ambient temperature in rats of different thyroid status, **263,** 258*P*

Microelectrode, a microwire technique for long term recording of single units in the brains of unrestrained animals, **263,** 99*P*

Microscope, integral –/manipulator unit for electrophysiologists, **263,** 117*P*

Milk secretion, acute cold exposure and – in the goat, **263,** 176*P*

Motilin, 13, norleucine-motilin (NLEM) and the control of interdigestive intestinal myoelectric activity in the conscious dog, **263,** 225*P*

Motoneurones, the after-hyperpolarization of gamma –, **263,** 124*P*

activation and inactivation of K channels in cat spinal –, **263,** 126*P*

Motoneurones, short-term synchronization of intercostal – activity, **263,** 357
Motor cortex, the effect of cooling the – of a rhesus monkey upon visually controlled movement and associated motor potentials, **263,** 142*P*
Motor end-plate, the structure of the terminal innervation of rat skeletal muscle in experimentally induced hypo- and hyper-thyroidism, **263,** 240*P*
Motor units, the fate of motor axon sprouts in a partially denervated mouse muscle when regenerating nerve fibres return, **263,** 181*P*
Muscle contraction, the force generated by a visceral smooth muscle, **263,** 199
Muscle fatigue, effect on – of the changes in the capillary bed induced by long-term stimulation, **263,** 155*P*
Muscle fibre, delayed rectification in the skeletal – of the crab, **263,** 251*P*
Muscle membrane, an evaluation of the membrane constants and the potassium conductance in metabolically exhausted muscle fibres, **263,** 215
Muscle metabolism, effects of fatty acids and contraction on rat soleus muscle metabolites, **263,** 160P
Muscle spindles, serial-section analysis of cat – following observation of the effects of stimulating dynamic fusimotor axons, **263,** 180*P*
the response of spindle primary afferents to 1 Hz sinusoidal stretching during paired fusimotor stimulation, **263,** 182*P*
Myofibrils, activation of isolated bundles of frog – in Ca-buffered solutions, **263,** 161*P*

Nerve, microtubules in myelinated and unmyelinated axons from rat sciatic –, **263,** 216*P*
Nerve action potential, a spike discriminator for signals from small axons, **263,** 107*P*
Neuromuscular junction, the binding of labelled saxitoxin to normal and denervated muscle, **263,** 129*P*
Neuromuscular transmission, – in the isolated diaphragm of the dystrophic mouse (129 Rej/dy.dy), **263,** 118*P*
Neurophysiology, averaging machines for electrical signals in –, **263,** 94*P*
Neurotransmitter, the identification, synthesis and actions on single neurones of a novel tripeptide isolated from cat spinal cord, **263,** 207*P*

Oesophagus, caudal thoracic oesophageal activity in suckled lambs, **263,** 114*P*
Oocyte, the effect of external Li on the distribution of Na, K and Cl in *Bufo bufo* oocytes, **263,** 207*P*
Ovum culture, growth of fertilized one-cell rabbit ova to viable morulae in the presence of pyruvate or fatty acids, **263,** 235*P*

Pain, modulation of noxious thermal input from the rat tail by descending spinal pathways, **263,** 136*P*
the thermal sensitivity of the polymodal nociceptors in the monkey, **263,** 539
Pancreas, the importance of calcium for caerulein and secretion evoked fluid and enzyme secretion in the perfused rat –, **263,** 223*P*
Pentazocine, conjugated and unconjugated – in the human foetal-maternal sytem and neonate, **263,** 239*P*
Placenta, ultrastructural changes in the – of the ewe after foetal hypophysectomy or adrenalectomy, **253,** 173*P*
the physiological changes in the vascular supply of the human –, a scanning and transmission electron microscopy study, **263,** 282*P*
Phosphate, efflux of inorganic phosphate from rabbit vagus in Locke and Na-free Locke, **263,** 215*P*
Photoreceptors, intracellular pH and light adaptation in barnacle –, **263,** 218*P*
the relation between intercellular coupling and electrical noise in turtle –, **263,** 257
Physiological Society, an experiment of Claude Bernard on curare: the origins of the –, **263,** 26*P*
the early minute books of the –, **263,** 29*P*
George Henry Lewes, George Eliot and the –, **263,** 45*P*
E. Sharpey-Schafer and the jubilee of the –, **263,** 54*P*
Physiology, how – grew from anatomy in the sixteenth and seventeenth centuries, **263,** 1*P*
physics and chemistry become the bases of – in the eighteenth century, **263,** 9*P*
– during the ninteenth century, **263,** 16*P*
T. H. Huxley and the development of – in Britain, **263,** 41*P*
Potassium conductance, an evaluation of the membrane constants and the – in metabolically exhausted muscle fibres, **263,** 215

Prostaglandin, unidirectional and net fluxes of ^{22}Na, ^{42}K and ^{36}Cl by the guinea-pig gall-bladder during prostaglandin E_1-induced secretion, **263,** 227*P*

effect of hypotonicity on – biosynthesis and cyclic AMP levels in frog skin, **263,** 277*P*

Purkinje fibres, transient inward current underlying arrhythmogenic effects of cardiotonic steroids in –, **263,** 73

some observations on abnormal pacemaker activity on endocardial – surviving myocardial infarction **263,** 248*P*

Pyramidal tract, prolonged decreases in excitability of – neurones, **263,** 141*P*

Receptive fields, physiological properties and – of mechanosensory neurones in the head ganglion of the leech: comparison with homologous cells in segmental ganglia, **263,** 489

–, geometry and conduction block of sensory neurones in the central nervous system of the leech, **263,** 513

Receptors, the distribution of GABA sensitivity on crayfish muscle receptor organs, **263,** 405

Reflex, the myotatic –, **263,** 78*P*

Edward Waymouth Reid: – a pioneer investigator of epithelial transport, **263,** 75*P*

Renal hypertrophy, cyclic nucleotides in compensatory –, **263,** 192*P*

Respiratory control, postural changes in respiratory drive during CO_2 rebreathing, **263,** 145*P*

the effects on tidal volume of the timing of P_{a,CO_2} oscillations relative to respiration in anaesthetized cats breathing air and a 5% CO_2 mixture in alternate breaths, **263,** 146*P*

interaction of peripheral and intracranial chemoreceptor respiratory drive in man, **263,** 147*P*

ventilation and the CO_2 content of mixed venous blood, **263,** 148*P*

Respiratory system, behaviour and aeration of the – in the domestic fowl embryo, **263,** 465

Reticulo-rumen, on the acid-induced abolition of reticulo-ruminal motility in sheep, **263,** 234*P*

Retina, power spectral measurements of noise in the turtle –, **263,** 103*P*

spatial properties of horizontal cell responses in the turtle –, **263,** 239

Rhythms, circadian and other rhythmic activity of neurones in the ventromedial nuclei and lateral hypothalamic area, **263,** 331

Saliva, effects of autonomic nerve stimulation on submandibular acini and – in cats, **263,** 198*P*

Secretory epithelia, micro-electrode recording of intracellular gradients of electrical and chemical potentials in –, **263,** 113*P*

Sense of effort, perception of effort during partial curarization, **263,** 186*P*

Sensorimotor cortex, the organization of the primary somatosensory and motor areas for the forepaw in the anaesthetized rat, **263,** 137*P*

the onset of cortical functioning in contact placing by kittens, **263,** 144*P*

Sensory neurones, physiological properties and receptive fields of mechanosensory neurones in the head ganglion of the leech: comparison with homologous cells in segmental ganglia, **263,** 489

receptive fields, geometry and conduction block of – in the central nervous system of the leech, **263,** 513

E. Sharpey-Schafer, – and the jubilee of the Physiological Society, **263,** 54*P*

Skeletal muscle, intracellular potassium concentrations and extracellular spaces in rat – immersed in normal, hypotonic and high-K modified Krebs fluid, determined by potassium-selective micro-electrodes, **263,** 158*P*

the contraction of polyneuronally innervated fibres of kitten muscles, **263,** 179*P*

changes in size and protein turnover of – after immobilization at different lengths **263,** 269*P*

an analysis of the influence of membrane potential and metabolic poisoning with azide on the sodium pump in –, **263,** 383

Sleep, – and respiration of rats during hypoxia, **263,** 149*P*

Smooth muscle, the force generated by a visceral –, **263,** 199

Smooth muscle, arterial, effects of MP 115 on –, **263,** 154*P*

membrane potential and excitation–contraction coupling in the smooth muscle cells of the rabbit ear artery, **263,** 163*P*

Smooth muscle, arterial, effect of noradrenaline on the membrane properties

and on the contraction of the rabbit main pulmonary artery, **236**, 164*P*

Smooth muscle, tracheal, the excitatory junction potential in tracheal smooth muscle, **263**, 243*P*

Smooth muscle, ureteric, the action of noradrenaline on the smooth muscle of the guinea-pig ureter, **263**, 245*P*

Sodium appetite, the assessment of – in calves using operant conditioning procedures, **263**, 178*P*

Sodium pump, influence of the – on intercellular communication in heart fibres; effect of intracellular injection of sodium ion on electrical coupling, **263**, 171

the effect of inhibiting the – on the differentiation of nerve cells, **263**, 211*P*

comparison of the Na^+ and H^+ pumps in a snail neurone, **263**, 212*P*

Na–Na exchange by the Na pump requires ATP as well as ADP, **263**, 214*P*

an analysis of the influence of membrane potential and metabolic poisoning with azide on the – in skeletal muscle, **263**, 383

Sodium transport, characterization of the transport pool for sodium in frog skin by X-ray microanalysis, 263, 202*P*

Spermatozoa, the effect of trypsin inhibitors on the *in vitro* acrosome reaction of guinea-pig –, **263**, 281*P*

Spinocervical tract, effects of noxious stimulation of the skin on transmission through the –, **263**, 135*P*

Squid axon, the squid and its giant nerve fibre (16 mm film, colour, sound 28 min), **263**, 99 *P*

E. H. Starling, E. H. Starling's mammalian heart–lung preparation, **263**, 81*P*

Stretch reflex, sinusoidal driving of finger joints, **263**, 184*P*

servo action in human posture, **263**, 187*P*

Stretch reflexes, – in forearm muscles, **263**, 263*P*

Sugars, – and sugar derivatives which inhibit the short-circuit current of the everted small intestine of the rat, **263**, 101

Swimming, division of labour between fish myotomal muscles during –, **263**, 185*P*

Sympathetic nerves, afferent sympathetic nerve fibres with aortic endings **263**, 157

Synapse, synaptic properties of identified neurones in the cerebral ganglion of *Aplysia* **263**, 244*P*

Synchronization, short-term – of intercostal motoneurone activity, **263**, 357

Taenia coli, the force generated by a visceral smooth muscle, **263**, 199

Thermal sensitivity, the – of the polymodal nociceptors in the monkey, **263**, 539

Thermoregulation, the effects of parachlorophenylalanine and 6-hydroxytryptamine on thermoregulatory responses to heat and cold stress, **263**, 208*P*

development of thermal stability in the neonate rat, **263**, 259*P*

cyclic adenosine 3,5-monophosphate in cerebrospinal fluid during – and fever, **263**, 441

Thyroid hormone, latency of metabolic stimulation by –, **263**, 241*P*

Tooth receptors, nerves with branched axons supplying more than one tooth or one tooth and the adjacent mucous membrane, **263**, 134*P*

Transducer, a simple, inexpensive mechano – system using frequency modulation, **263**, 232*P*

Transmitter, the chemical – at synapses in a sympathetic ganglion, **263**, 89*P*

Uterine metabolism, uterine blood flow and uptake of glucose in the pregnant ewe, **263**, 238*P*

Uterus, effects of removing foetuses from pregnant rat uteri on uterine collagen content, **263**, 237*P*

Vasopressin, the effect of arginine – (AVP) on the distribution of fluid in the rat, **263**, 157*P*

contrasting pattern changes in the firing of – and oxytocin secreting neurones during osmotic stimulation, **263**, 189*P*

the effect of – on renal calcium excretion in sheep: a possible explanation, **263**, 253*P*

Vein, varicose, the pressure exerted on superficial – by support hosiery, **263**, 151*P*

E. B. Verney. E. B. Verney's demonstration of 'The antidiuretic hormone and the factors which determine its release', **263**, 92*P*

Viscosity, the – of mammalian nerve axoplasm measured by electron spin resonance, **263**, 115

Vision, visual sensitivity to retinal image movements, **263**, 170*P*

on the analysis of nerve signals deduced from metacontrast experiments with human observers, **263**, 321

Visual cortex, position and orientation disparities as depth cues for striate neurones, **263,** 168*P*

synaptic mechanisms contributing to the length preference of hypercomplex cells, **263,** 171*P*

A. D. Waller, A. D. Waller's demonstrations of the human electrocardiogram, **263,** 63*P*

Work capacity, relationship between physical working capacity and body size and shape of male adolescents, **263,** 270*P*
